Contacting Blue Stakes Prior to Your Excavation Project May Save Your Life!

Please Silence Cell Phones

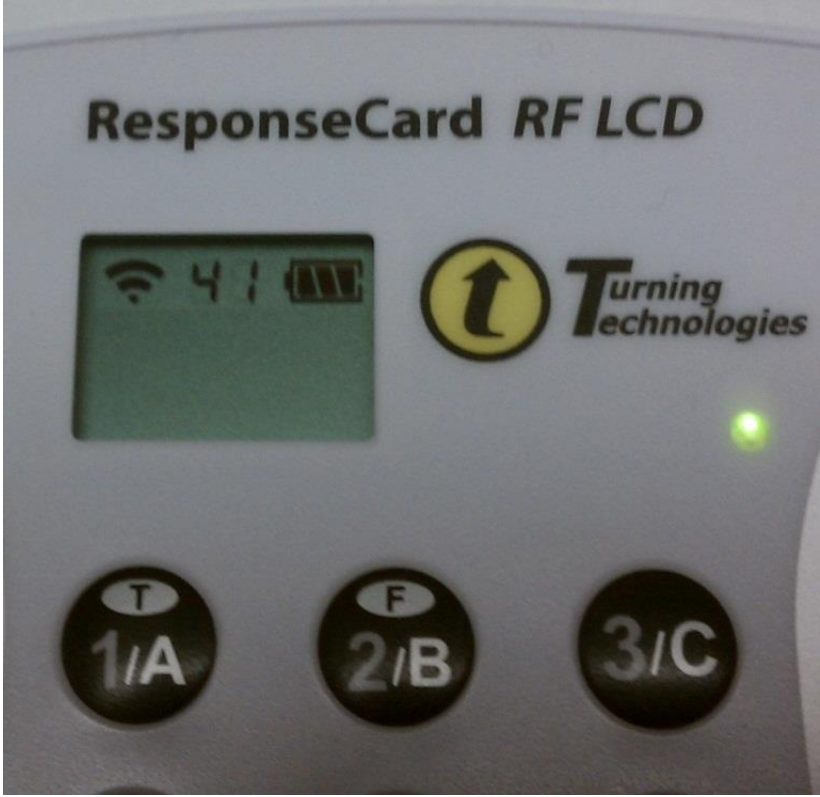

TODAY'S AGENDA

- 1. PIPELINE AWARENESS PRESENTATION**
- 2. CGA BEST PRACTICES VIDEO**
- 3. BLUE STAKES OF UTAH 811 PRESENTATION**
- 4. PRIZE DRAWING**
- 5. VISIT TABLE DISPLAYS**

TODAY'S LEARNING OBJECTIVES

- **Know what to do in case of a pipeline emergency.**
- **Learn more about Common Ground Alliance (CGA) and how to implement Best Practices.**
- **From Awareness to Action in Damage Prevention.**
- **Understanding state law and taking accountability in every stage of excavation.**

Signs of a Pipeline Leak

Mercaptan

- Natural gas is odorless
- Don't rely on your sense of smell
 - Not all natural gas pipelines are odorized
 - Gas leaks underground can filter the smell out
- Mercaptan is added when delivering gas to residential, and business customers
- Transmission Pipeline Operators typically do not odorize transmission pipelines

Dos of Excavating near Pipelines

- Do **Call 811** before starting any excavation
- Do ensure that pipeline representatives are on **location**.
- Do follow **all** state **laws** tied to excavations around pipelines.
- Do **adhere** to all pipeline requirements while working around or near pipelines.
- Do **Stop Work** and report any suspected damage to a pipeline.

Don'ts of Excavating near Pipelines

- Don't perform any excavation without an **active** One Call ticket.
- Don't excavate around a pipeline without a pipeline representative on **location**.
- Don't **cross** a buried pipeline with heavy equipment without first talking with the pipeline operator.
- Don't try and repair any **damage** caused to a pipeline by you when excavating.
- Don't **backfill** if there is suspected damage.

Pipeline incident result of excavation.

**This type of pipeline damage is
100% preventable.**

Pipeline Emergencies

In case of a pipeline emergency:

- Don't try to stop the product leak yourself by closing valves or other measures
- Get your crew and yourself to a safe place
- Call 911
- Call the pipeline's emergency number

Key Takeaways

- Pipeline Operators must have a representative onsite if you are working within their right of way
 - 50' to 75' buffer zone
- Some pipelines are installed above ground
- Some pipelines will get exposed by erosion or will change the depth of cover
- State laws require that mechanical equipment must stay 2' away from a pipeline

Key Takeaways

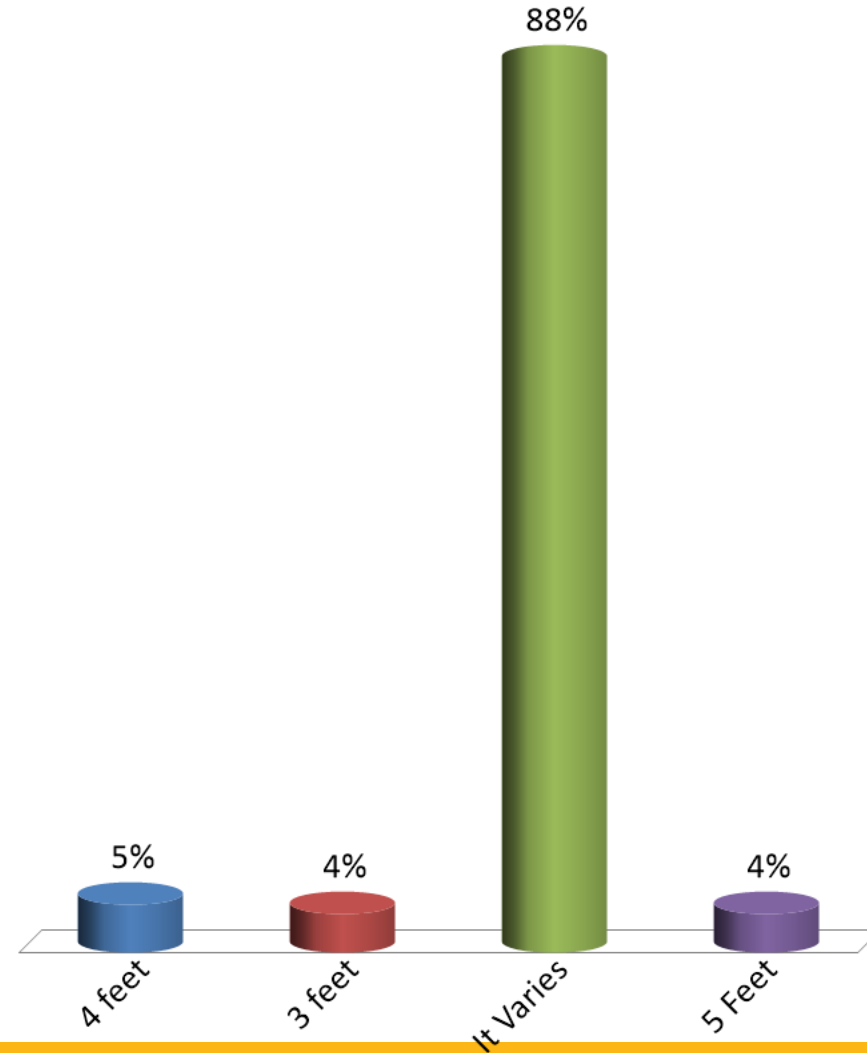

- In one calendar year one Utah pipeline operator experienced over 1400 dig-ins known as third party damage. 40% to 50% of excavators who caused damaged did not call Blue Stakes prior to starting work.
- Every company performing excavation work is required by law to have a one call ticket.
 - Don't take a short cut to get a job done by thinking you can use another contractors 811 ticket.
- Encourage your colleagues to have an active ticket

“Clickers”

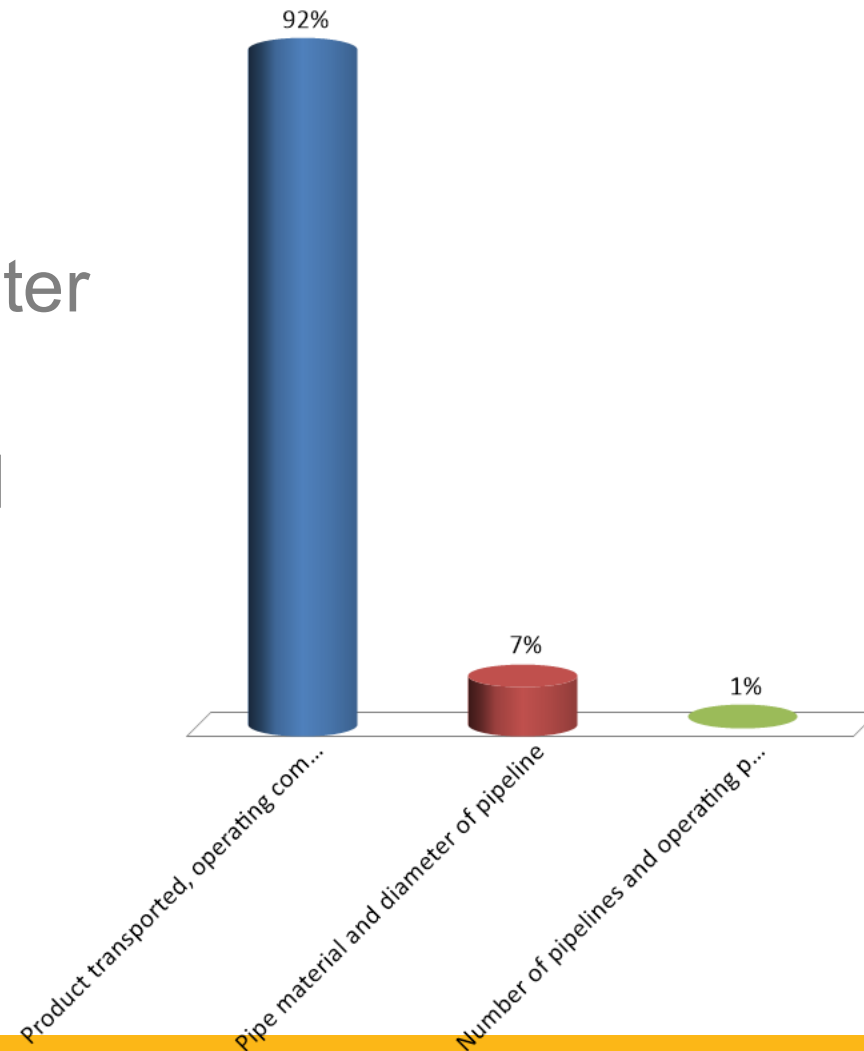

What depth are pipelines buried at?

- A. 4 feet
- B. 3 feet
- C. It Varies
- D. 5 Feet

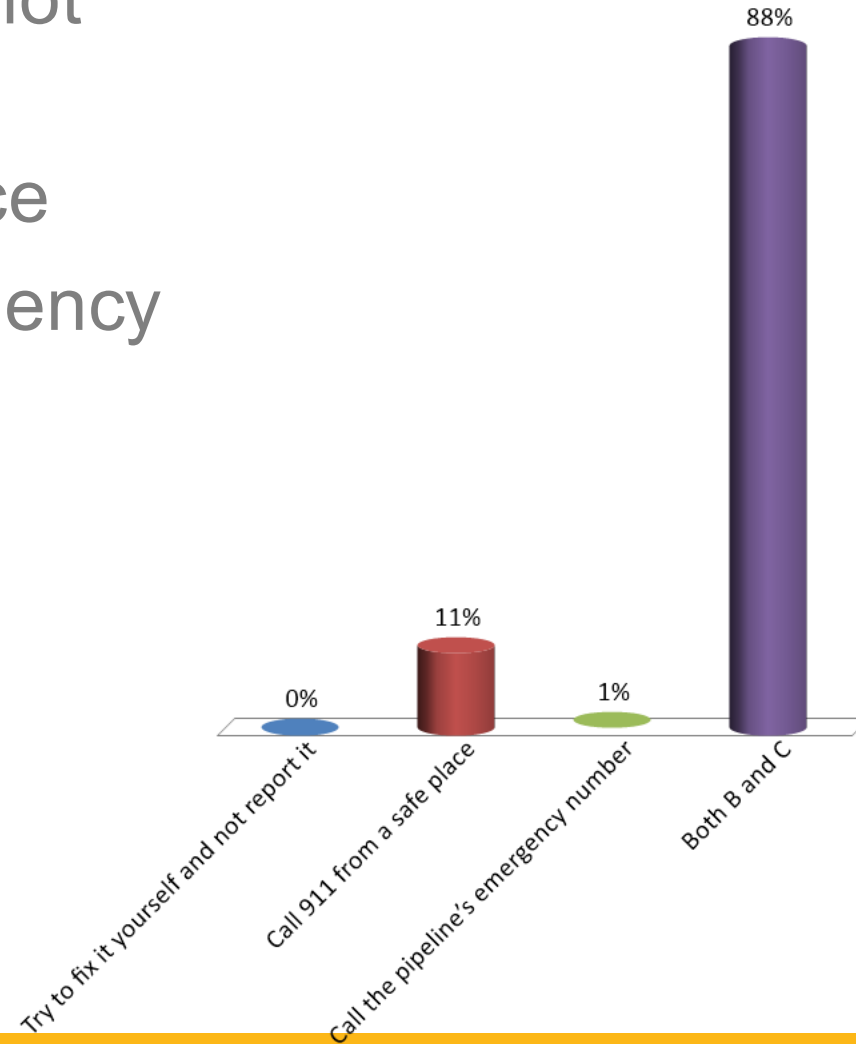

What information is required on all pipeline markers?

- A. Product transported, operating company, and emergency number
- B. Pipe material and diameter of pipeline
- C. Number of pipelines and operating pressure

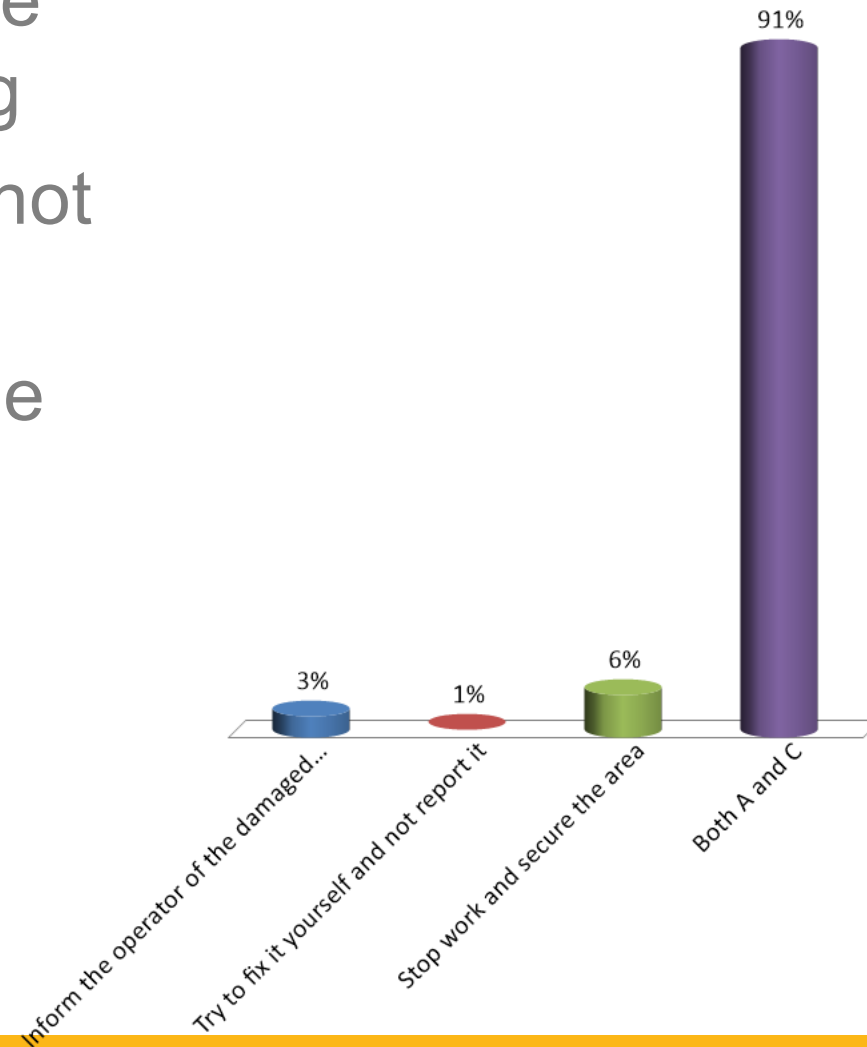

In the event of a pipeline emergency, which of the following actions should be taken?

- A. Try to fix it yourself and not report it
- B. Call 911 from a safe place
- C. Call the pipeline's emergency number
- D. Both B and C**

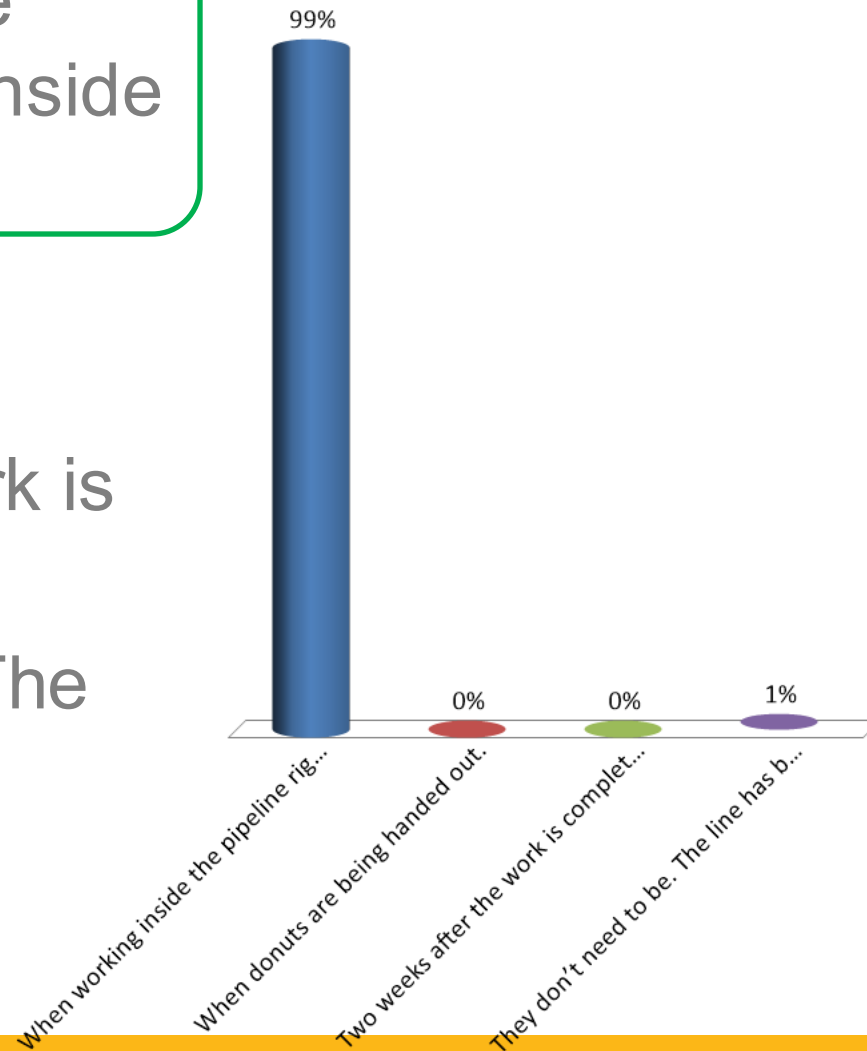

If you damage a pipeline while excavating, which of the following actions should be taken?

- A. Inform the operator of the damaged pipe or coating
- B. Try to fix it yourself and not report it
- C. Stop work and secure the area
- D. Both A and C**

When would a Pipeline Operator need to be onsite...

- A. When working inside the pipeline right of way or inside the buffer zone.
- B. When donuts are being handed out.
- C. Two weeks after the work is completed.
- D. They don't need to be. The line has been marked.

Blue Stakes
Online Before
You Dig!

Bluestakes.org

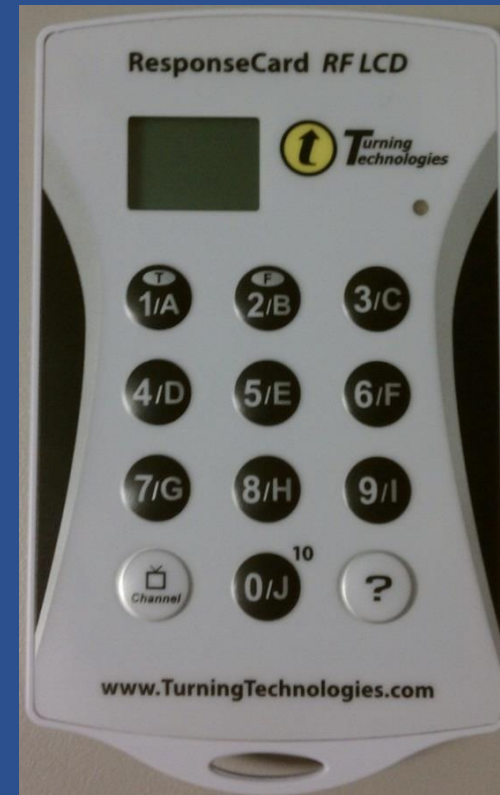

It's a FREE Service and It's the Law!

SAFETY IS IN YOUR HANDS.
EVERY DIG. EVERY TIME.

Get Your Clickers Ready

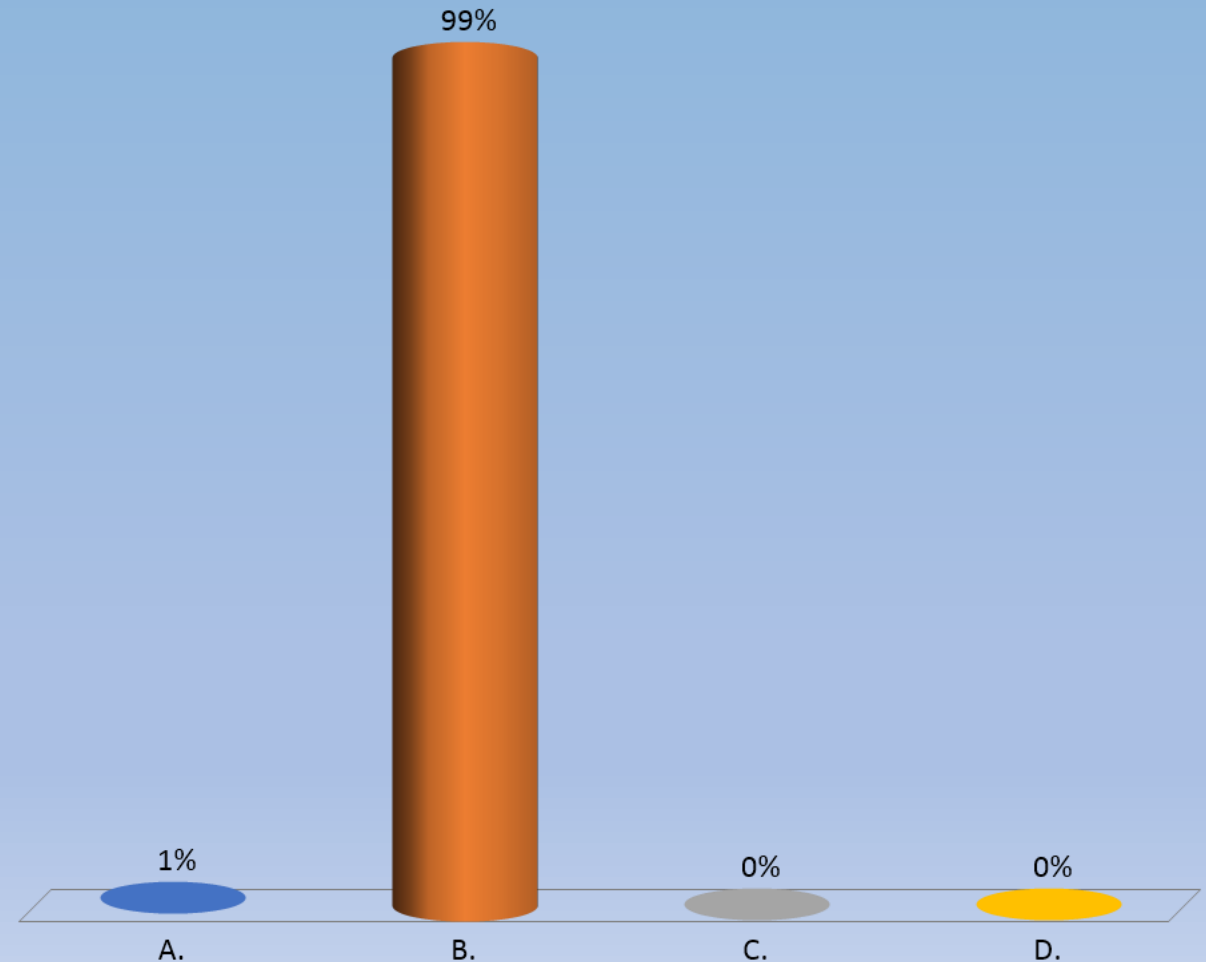

TEST YOUR KNOWLEDGE

What is the first step before any excavation in Utah?

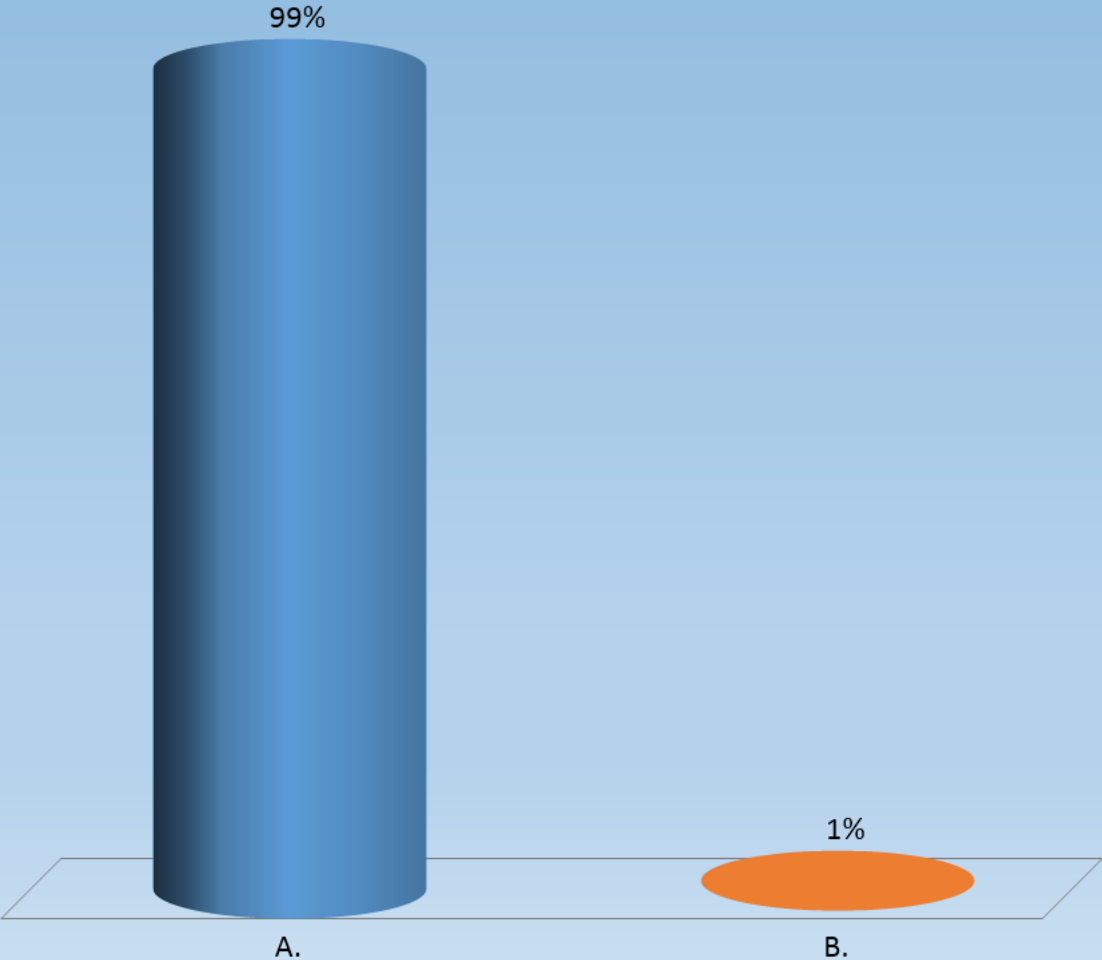

- A. Contact a private locating company
- B. Submit a locate request to Blue Stakes of Utah 811
- C. Begin digging carefully with a shovel
- D. Ask neighbors where their utility lines are

The state law requires ANYONE who is digging to contact Blue Stakes to submit a locate request?

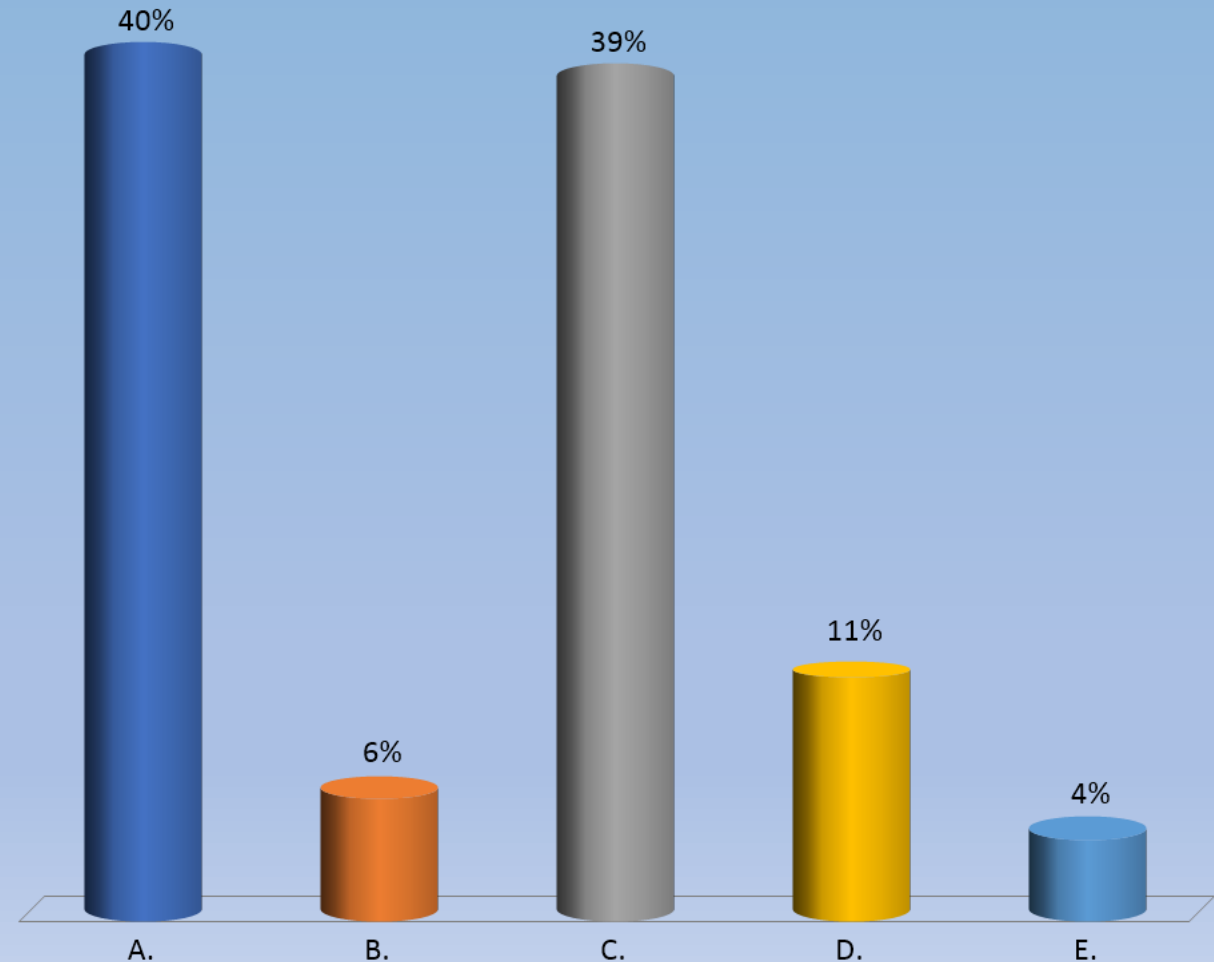

A. True

B. False

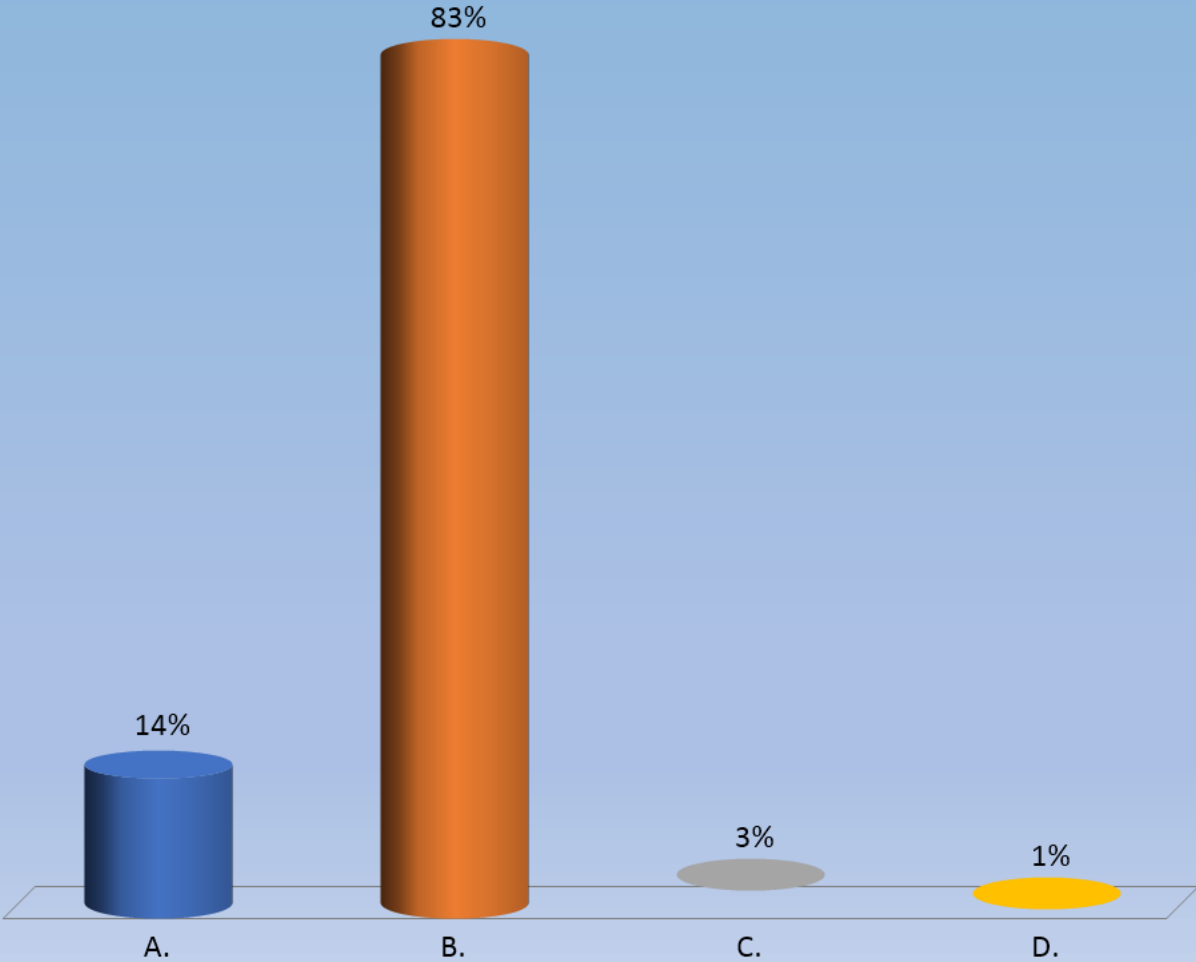

What are the Blue Stakes of Utah 811 Notification Center hours?

- A. 7 a.m. – 5 p.m.
- B. 7:30 a.m. – 5:30 p.m.
- C. 8 a.m. – 4 p.m.
- D. 8:30 a.m. – 4:30 p.m.
- E. 9 a.m. – 5 p.m.

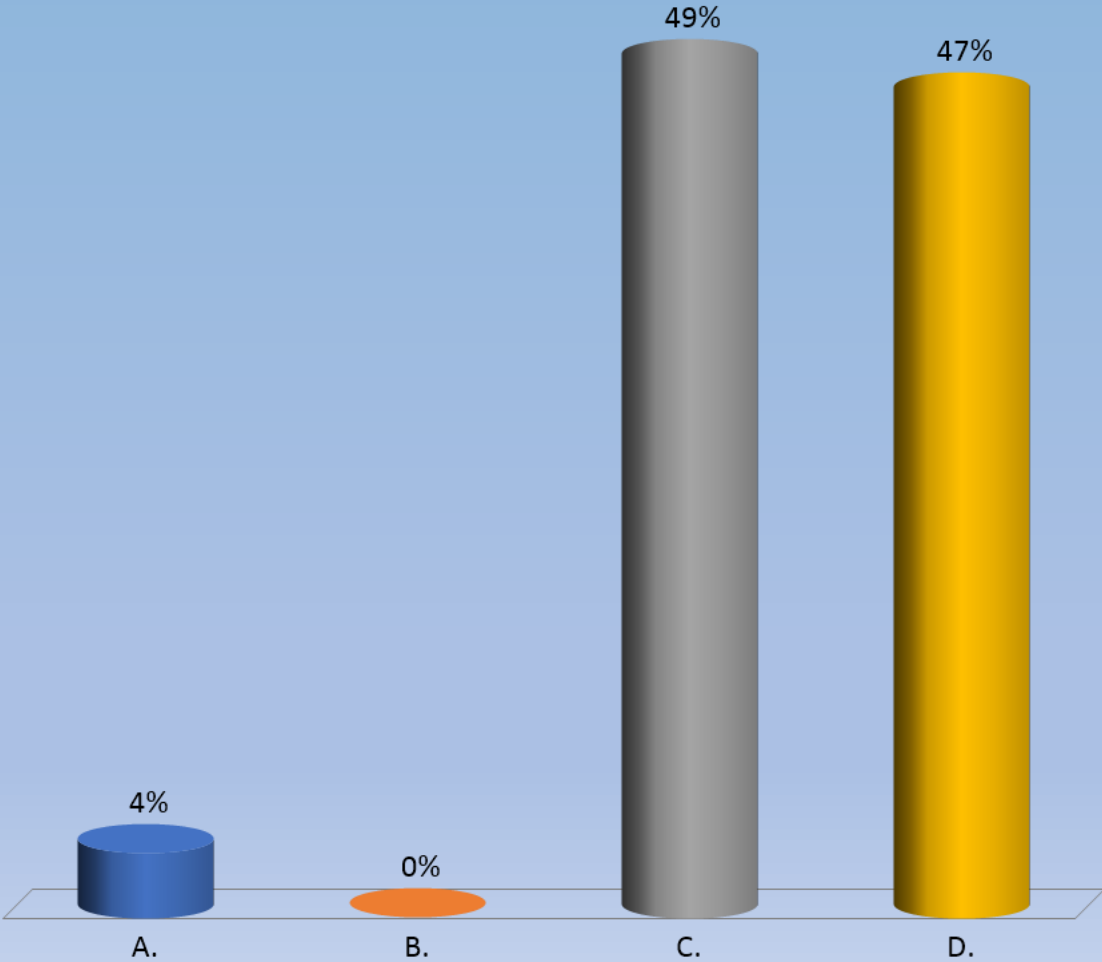

How much advance notice must be given in Utah before excavation (excluding emergencies)?

- A. At least 24 hours
- B. 3 business days
- C. 7 days
- D. Same day as the excavation

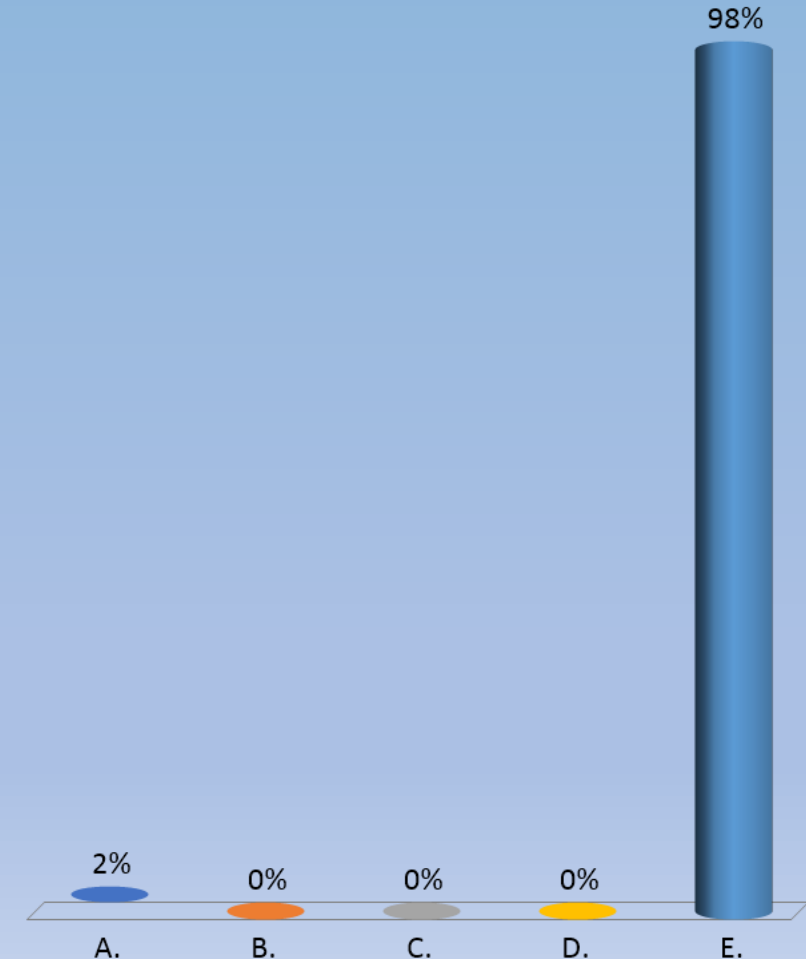

Who is responsible for locating and marking underground utilities after the locate request is made?

- A. The excavator or homeowner
- B. The city building inspector
- C. Member Facility Operators
- D. Blue Stakes of Utah 811

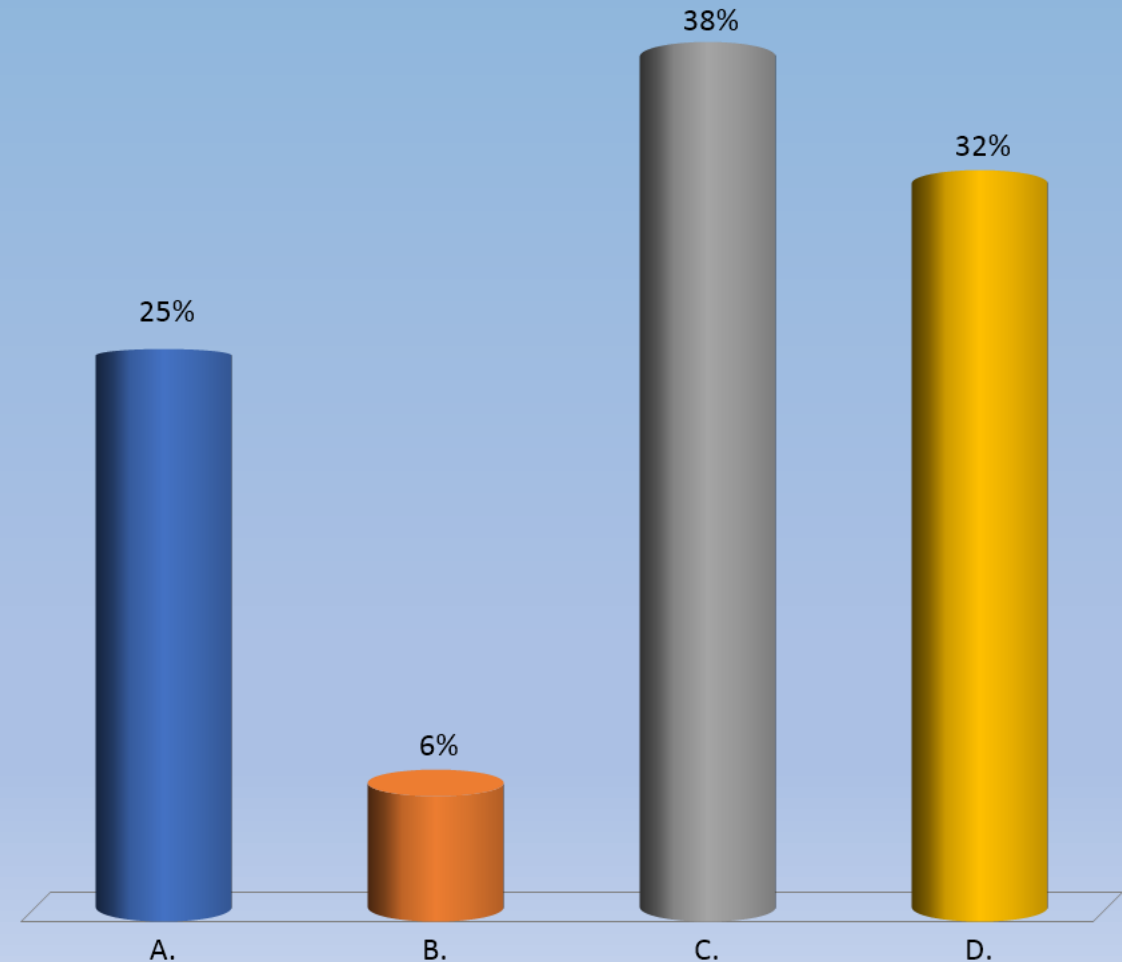

Why should Excavators and Facility Operators utilize Electronic Positive Response (EPR)?

- A. Easily identify which member facility operators have responded to the locate request
- B. Reduces downtime, wasted time, damages, and duplication of effort
- C. Reduces frustration and miscommunication
- D. Reduces No Response Notices (NRSP) requests and other unneeded ticket revisions
- E. All the above

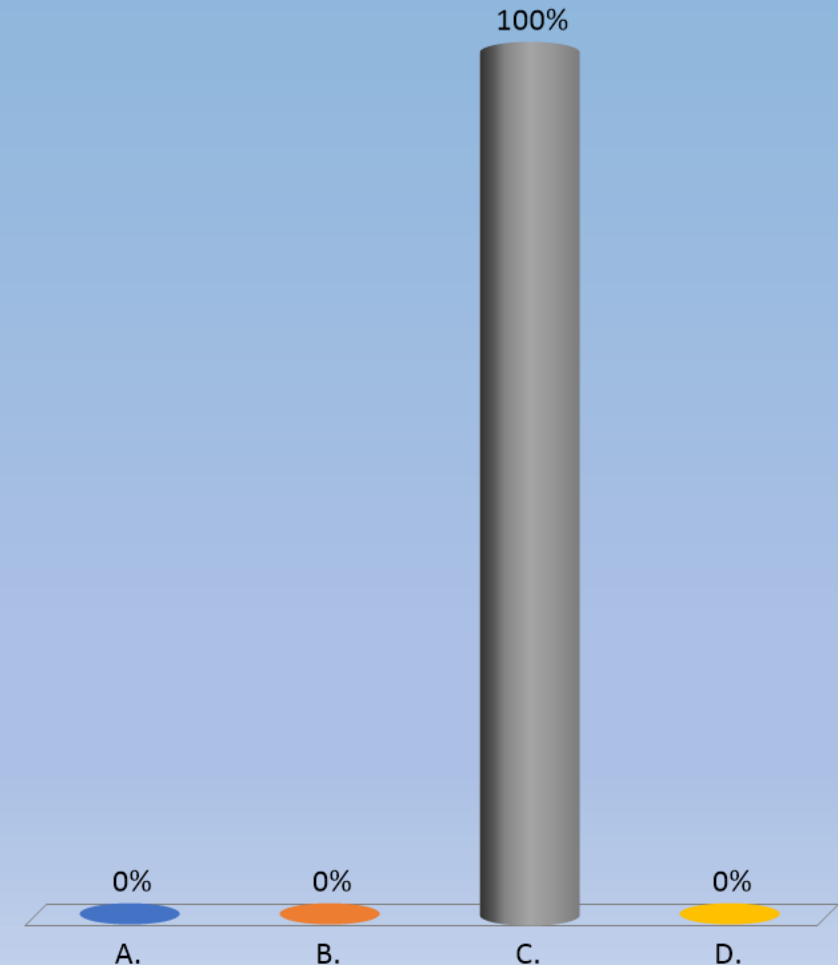

How long is a locate request valid for in Utah from the day that the request is processed?

- A. 14 business days
- B. 10 business days
- C. 14 calendar days
- D. 21 calendar days

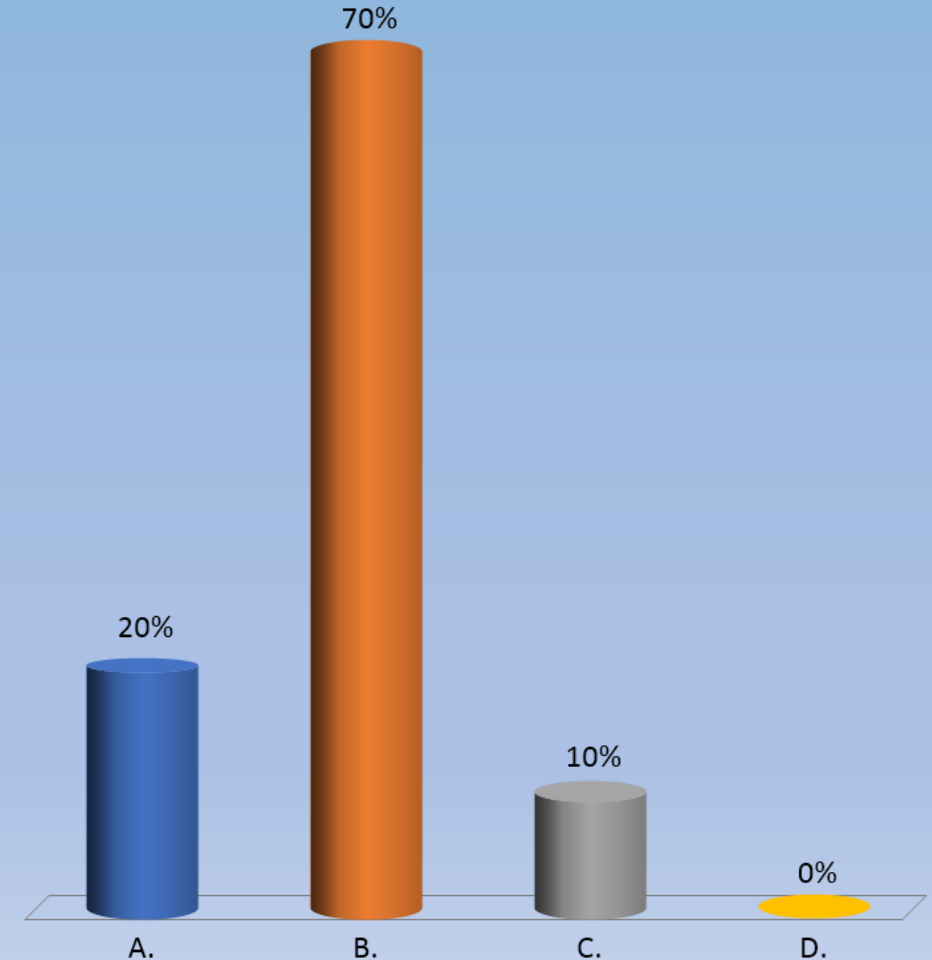

What should an excavator do if utility markings become faded, lost, or destroyed during a project?

- A. Continue digging and use caution
- B. Re-mark them personally with spray paint
- C. Submit a request for “re-mark” with Blue Stakes of Utah 811
- D. Contact the property owner for assistance

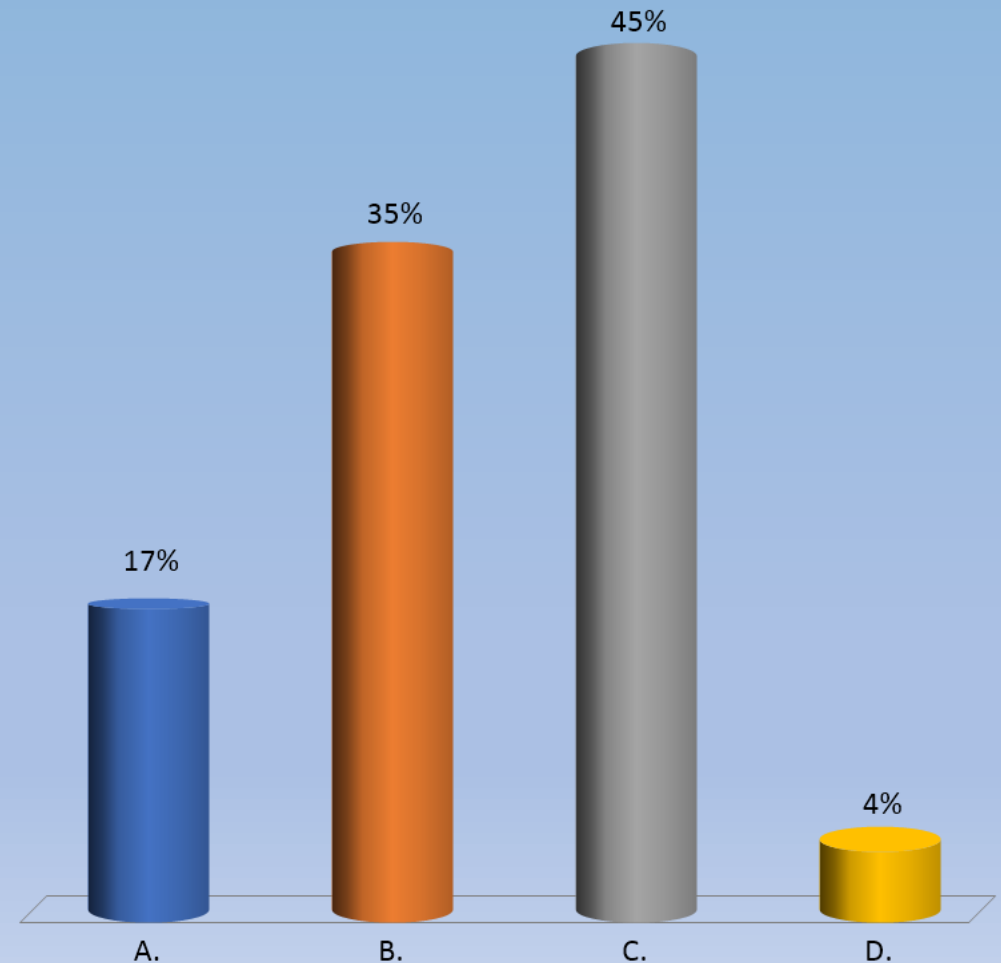

What are private utility lines?

- A. Any line owned and maintained by a utility company
- B. Lines beyond the meter or main service connection, usually on private property
- C. All utility lines within the public right-of-way
- D. Sewer laterals only

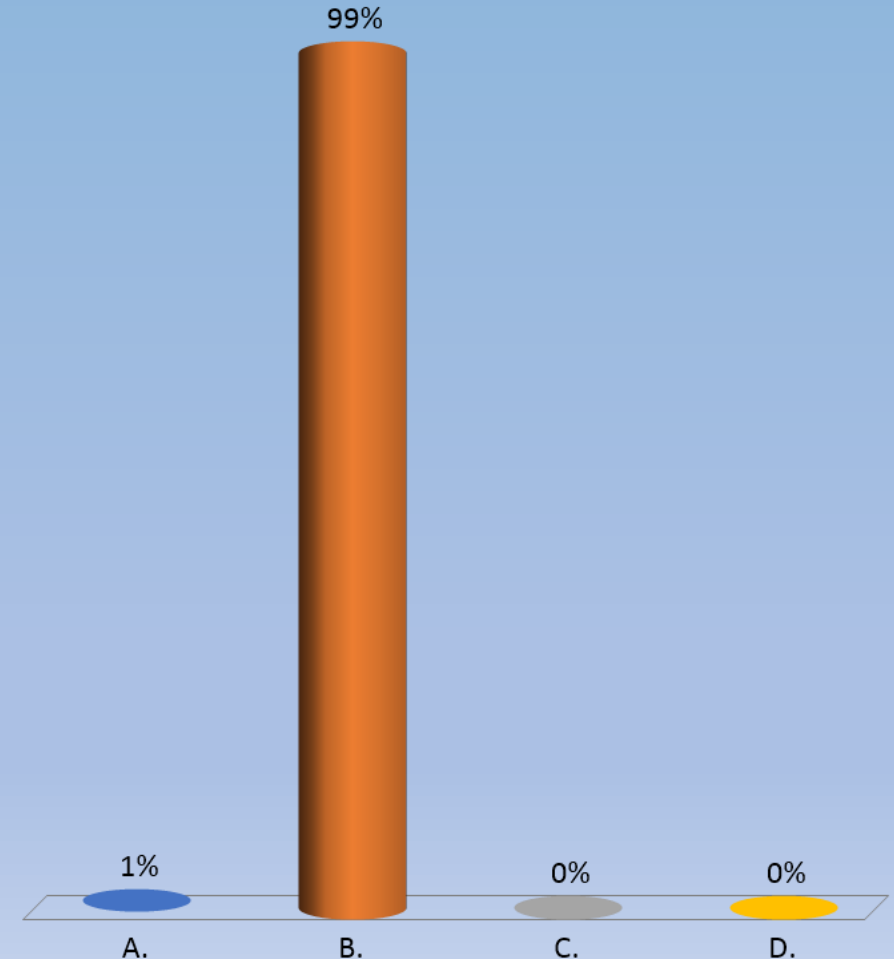

Who is responsible for locating and marking private utility lines?

- A. Blue Stakes of Utah 811
- B. Utility companies
- C. A private locating service hired by the property owner or excavator
- D. City or county building departments

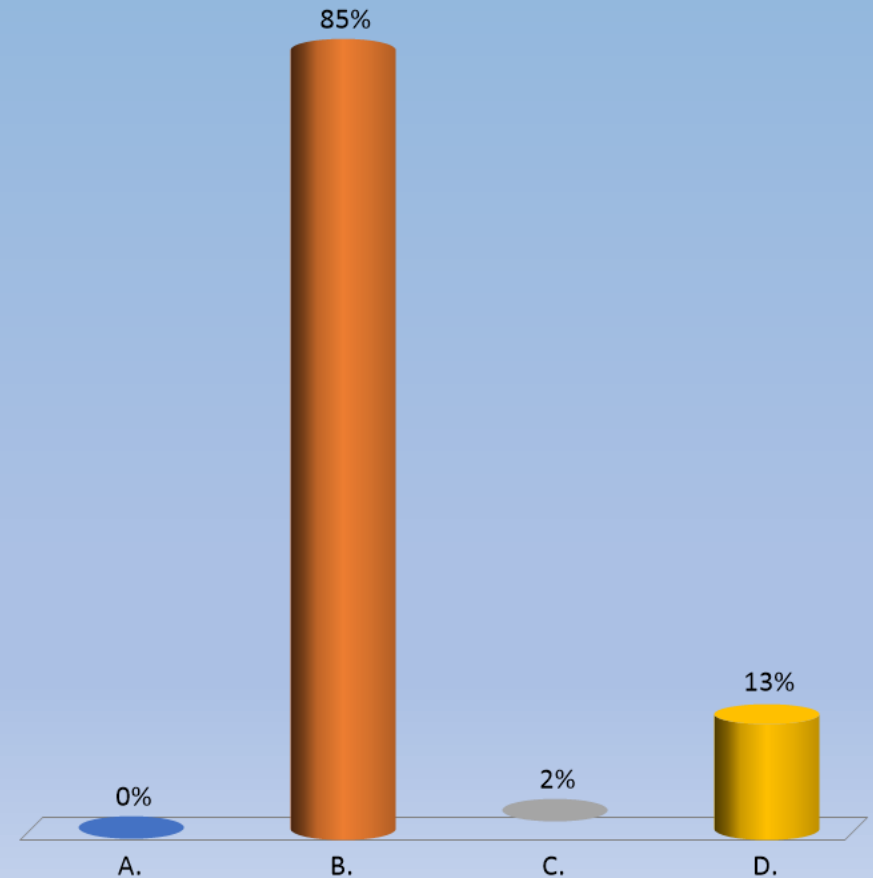

What is the purpose of a utility easement on private property?

- A. To restrict property use
- B. To allow utility providers legal access to install and maintain their lines
- C. To designate extra land for property owners
- D. To guarantee tax reductions for property owners

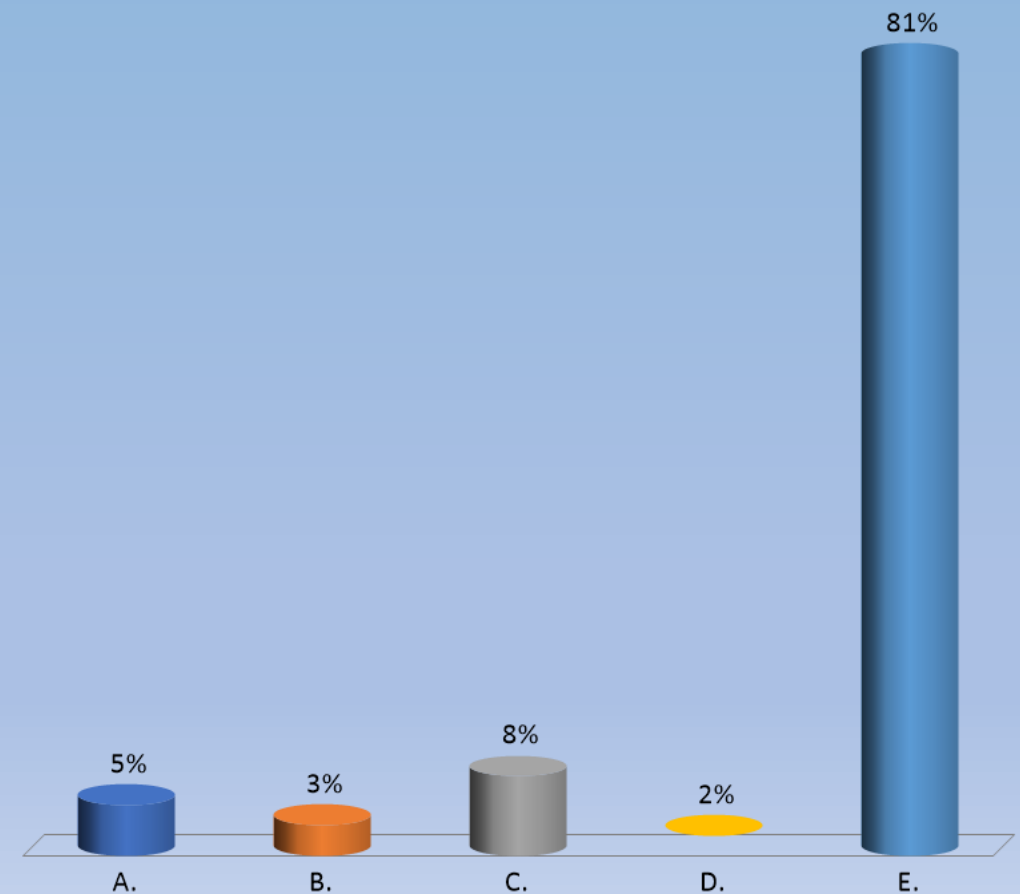

The Tolerance Zone in Utah is the area surrounding a facility within ___ inches on either side of the markings or ___ inches in each direction from the outside edge of an above ground facility?

- A. 12 inches**
- B. 24 inches**
- C. 30 inches**
- D. 36 inches**

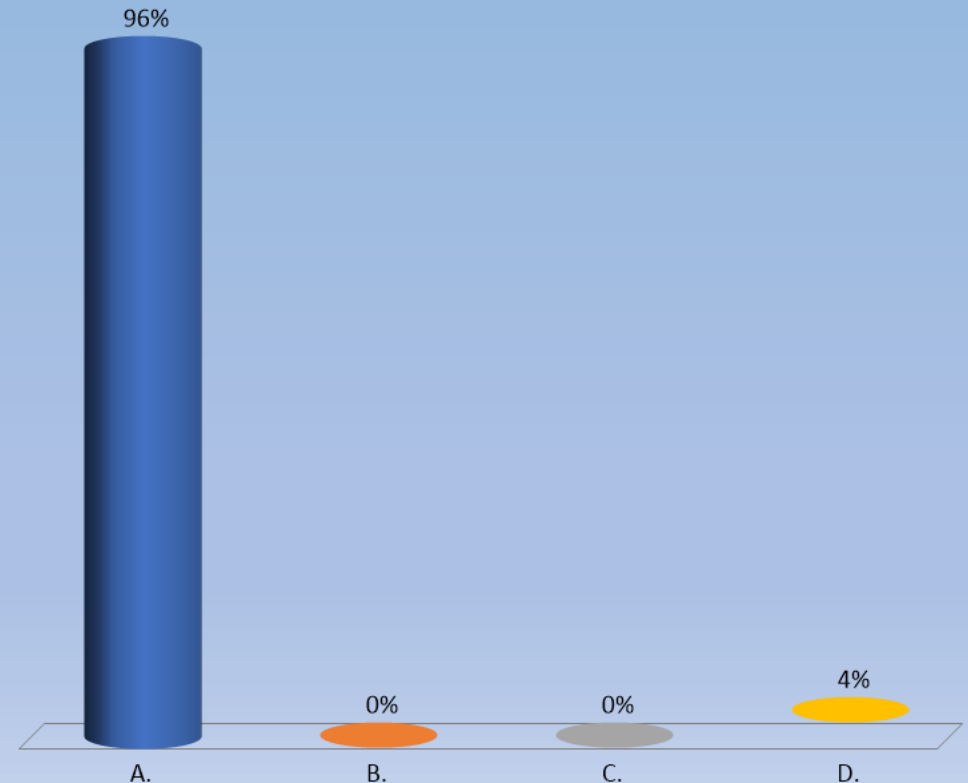

What are the non-intrusive methods that can be used to identify an underground utility within the tolerance zone?

- A. Hand Tools
- B. Potholing
- C. Vacuum excavation
- D. Air Knife
- E. All the above

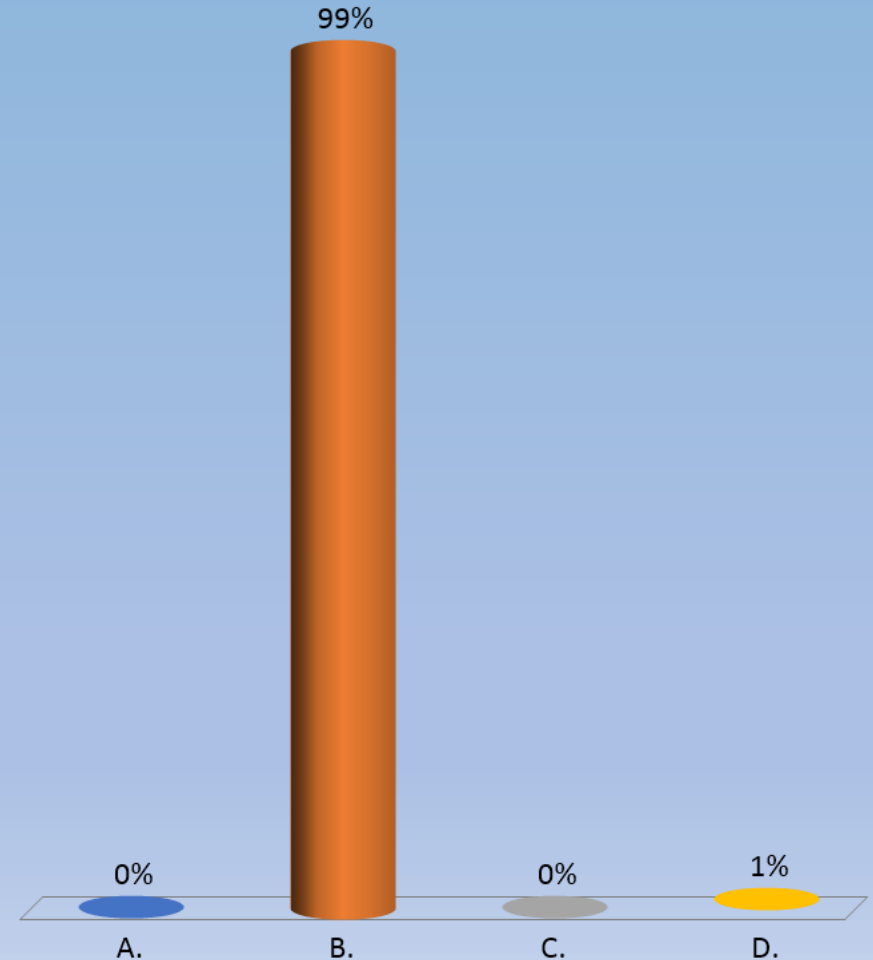

Who must be notified immediately if any contact or damage to a facility results in the discharge of electricity or escape of any flammable, toxic, or corrosive gas or liquid, OR that endangers life, health, or property?

- A. 911 and the facility owner/operator**
- B. Only on-site personnel**
- C. Only the project supervisor**
- D. Blue Stakes of Utah 811**

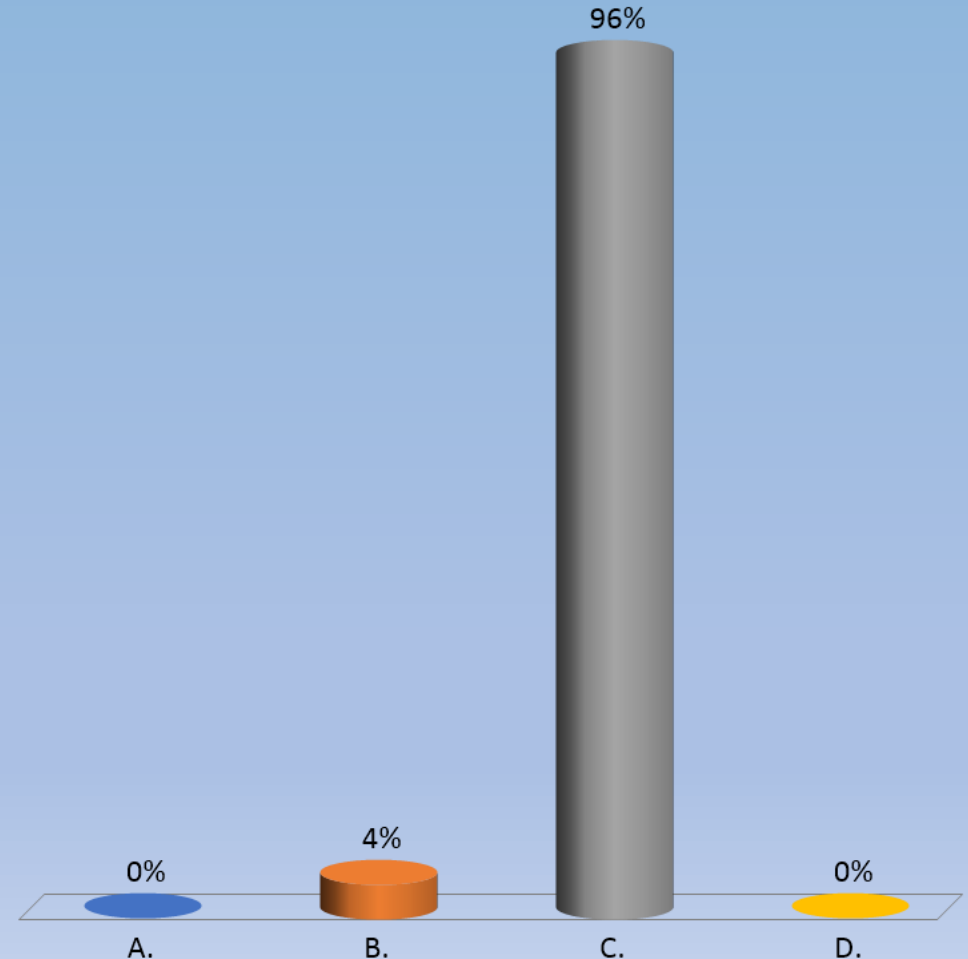

If excavation continues beyond the life of the original locate request, what must the excavator do?

- A. Keep working with caution
- B. Submit an “Update” request at least 3 business days prior to the expiration of the original locate request**
- C. Submit a new project permit to the city
- D. Call the utility companies directly

What should an excavator do if a member facility operator/locator fails to respond to a locate request in Utah?

- A. Start digging carefully anyway
- B. Submit a new locate request
- C. Submit a NRSP (No Response Notice) to Blue Stakes of Utah 811
- D. Call the city for permission

How deep can you dig before you need to contact Blue Stakes and submit a locate request?

Utah State Law requires at least three (3) business days' notice, but not more than 14 calendar days before the commencement of excavation.

| Sunday | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
|--|---|--|---|---|--|--|
| | 1  | 2  | 3  | 4  | 5  | 6  |
| 7  | 8 8 AM and After  Blue Stakes of UTAH 811 bluestakes.org | 9 48 Hours Begins at 8 AM  | 10  | 11  8 AM | 12 | 13 |

**Blue Stakes of Utah 811
operating hours are the
same as the Business
Hours defined in the law**

**"Business hours" means the
hours between 8:00 a.m. and
4:00 p.m. Monday through
Friday, excluding holidays.**

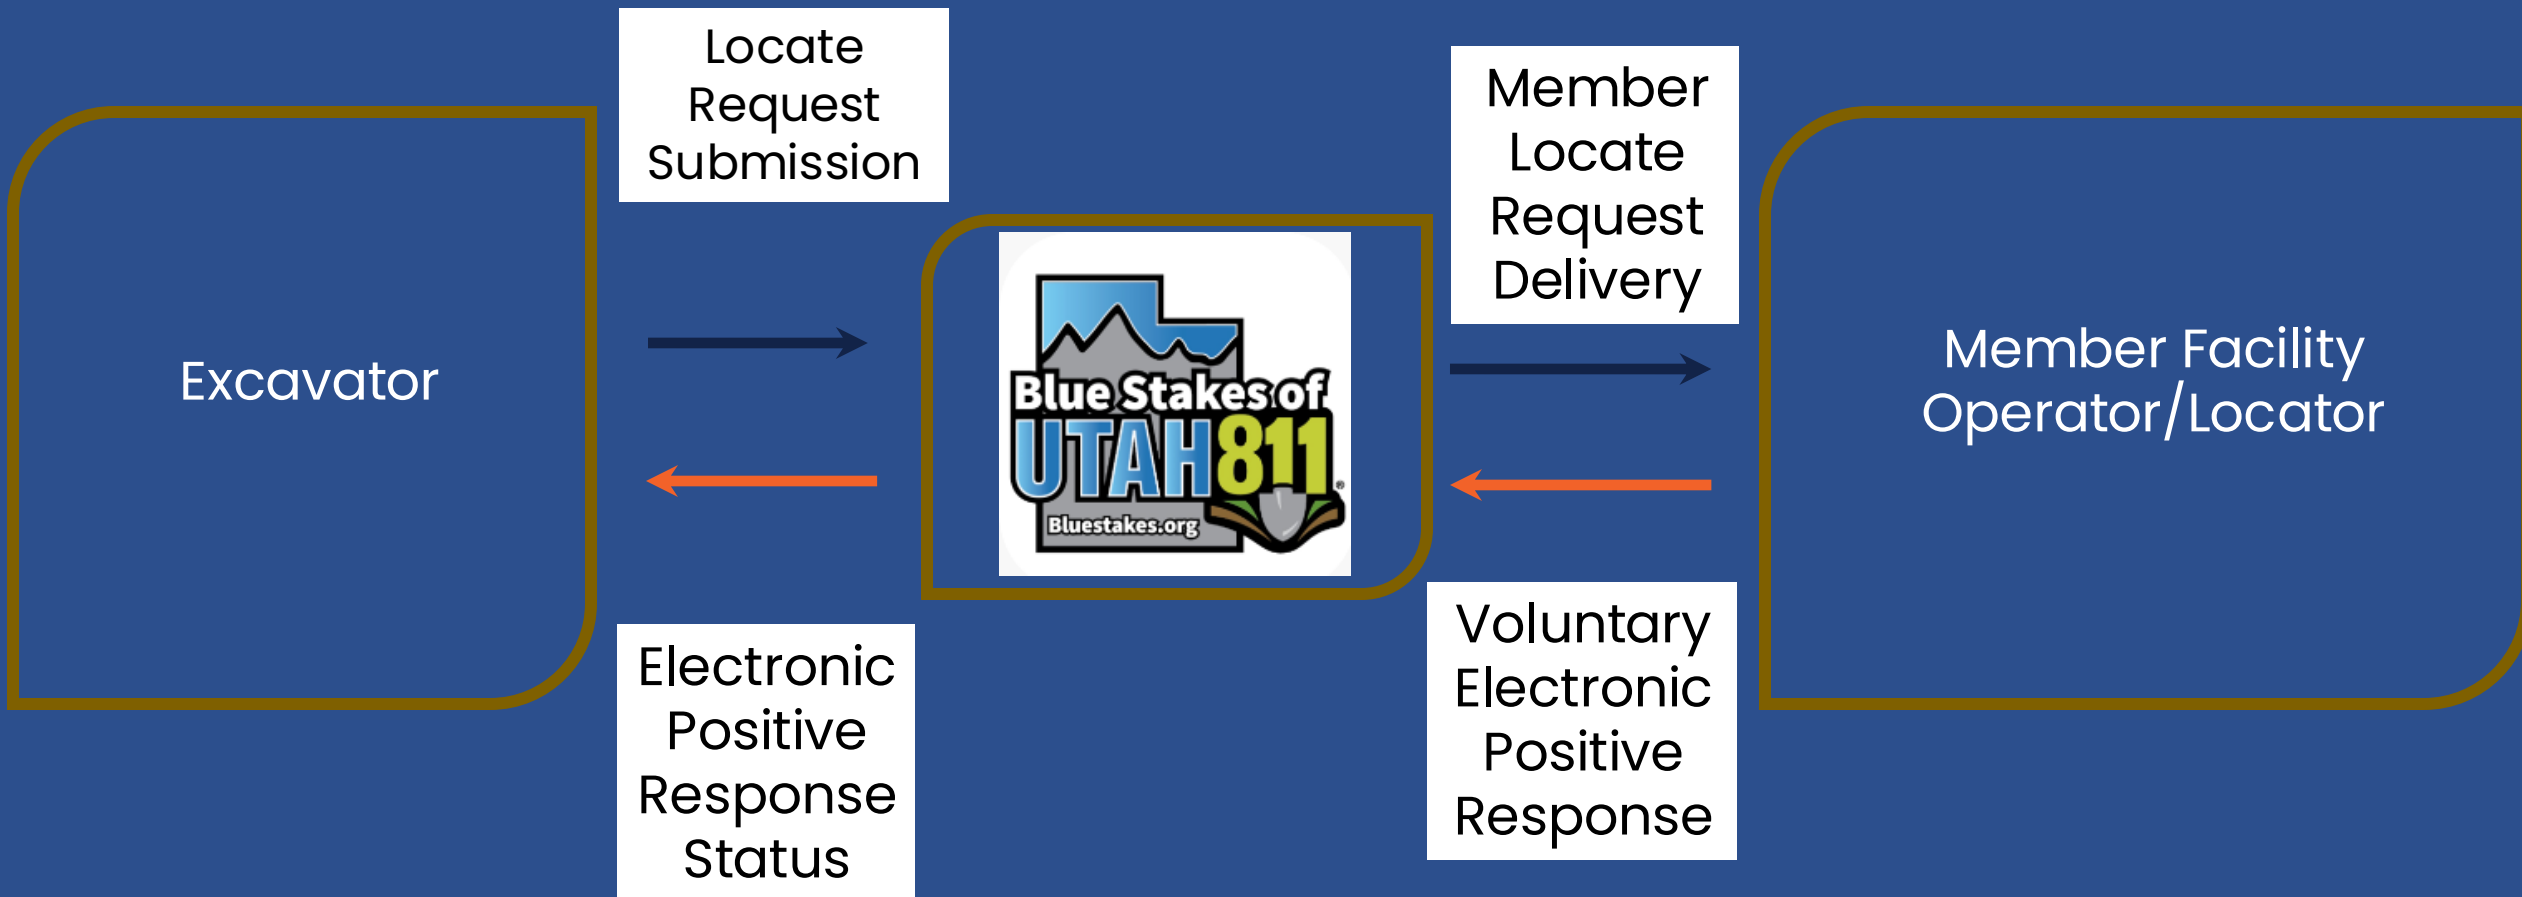

No Response Notice (NRSP)

- Excavators are **required** to submit an NRSP notice to Blue Stakes if they are aware of or observe any unmarked facilities in their work area before they can start digging.
- Excavators are **required** to provide to Blue Stakes which member facility operators or facility types have not marked. Blue Stakes is required to send a notification to just those member facility operators/facility types indicated by the excavator.
- Member Facility Operators are **required** to respond and/or mark their lines within **4 business hours** of the NRSP notice.

BLUE STAKES COMMUNICATION WORKFLOW

Excavator and Member Facility Operator

The best ways for an excavator to check the response to their locate request are to visually examine the worksite for markings and check for voluntary EPR responses at

bluestakes.org

**Why should
Excavators and
Member Facility
Operators utilize
Electronic
Positive Response
(EPR)?**

Electronic Positive Response (EPR)

- **Easily identify which member facility operators have responded to the locate request**
- **Reduce downtime, wasted time, and duplication of effort**
- **Reduce frustration and miscommunication**
- **Reduce No Response Notices (NRSP) requests and other unneeded ticket revisions**
- **Reduce damages**

Excavators – view the list of Member Facility Operators on locate requests

Thank you for contacting Blue Stakes of Utah 811 regarding your upcoming digging project. Please review your locate request below and save it for your records.

If any of the information is incorrect, please contact Blue Stakes ASAP by dialing 811 or 801-208-2100, option 1 and reference your locate request number.

Locate Specialists are available Monday - Friday, 8 AM - 4 PM, except Holidays.

DO IT YOURSELF ONLINE! Visit <https://www.bluestakes.org/how-it-works/#locate-request> before your next project! Existing locate requests can be updated and new locate requests can be created online quickly and easily, 24 hours a day. No need to wait on hold!

Please allow up to 3 full business days for the facility lines to be marked. To view responses regarding the status of your locate request, visit <https://www.bluestakes.org/epr/> and then "Check Locate Request Response".

If an Excavator is aware of or observes indications of a facility that was not marked in the work area covered by a current locate request, they are required to submit a No Response Notice (NRSP) before they can start digging and provide which facility operator(s) or facility type(s) have not responded or marked.

This can be done anytime online at <https://otr.bluestakes.org/> or by calling 811 during business hours.

Utah Code Title 54, Chapter 8a, Damage to Underground Utility Facilities Act has been amended effective May 1, 2024. Visit <https://www.bluestakes.org/law/> for additional details.

For additional information about the next steps in the process, other pertinent details, or frequently asked questions, please visit <https://www.bluestakes.org/faqs/>. Dig Safely!

Excavators – view the EPR responses on locate requests

Thank you for contacting Blue Stakes of Utah 811! This is an automated electronic positive response (EPR) confirmation for the locate request ticket number listed below. It contains the EPR responses from the member facility operators who received notice of your excavation and utilize Blue Stakes EPR system.

EPR is voluntary for facility operators in Utah. An EPR code of "999 - VOLUNTARY ELECTRONIC POSITIVE RESPONSE (EPR) NOT POSTED BY MEMBER FACILITY OPERATOR" will be applied to the locate request if no voluntary EPR response is posted by the member facility operator. A 999 EPR code on the Locate Request means that the member facility operator did not post a response through EPR at this time. Please confirm if markings are present on site or have been cleared by the member facility operator before submitting a No Response Notice (NRSP) due to this 999 EPR code.

For your safety, please respect and protect the marks, excavate carefully around the facility lines/markings, and contact Blue Stakes if you are concerned there may be unmarked facilities.

For updated EPR information visit: <https://www.bluestakes.org/epr/>

This is an automatically generated email. Please do not reply to this message.

If you have questions about a response, please contact the "RCVR CONTACT" listed below for that member facility operator.

After the markings have been made, excavators should maintain a minimum clearance within the Tolerance Zone, which is:

- 24 inches on either side of the outside edge of the mark indicating a facility;
- a distance of one-half of the marked diameter plus 24 inches on either side of the designated center where a diameter of the facility has been marked; and
- 24 inches in each direction of the outside edge of a physically present above-ground facility.

Do you know what methods can be used to identify an underground utility within the tolerance zone?

Blue Stakes Online Ticket Revision

The Blue Stakes "Online Ticket Revision" application may be used to perform any one of the following actions as long as the information appearing on the existing locate request (ticket) does not need to be modified or edited:

1. "NO RESPONSE" for a current locate request:

A No Response Notice may be submitted no sooner than two (2) hours before legal date and time and no later than four (4) business hours before the expiration (good thru) date and time. Excavators will be required to specify which facility operators or facility types have not responded to the locate request. The No Response Notice will only be delivered to the specified member facility operator. The notified member facility operators will have four (4) business hours to respond to the No Response Notice.

2. "UPDATE" an existing locate request:

Locate requests are valid for twenty-one (21) calendar days. Locate requests are required to be updated for excavations lasting longer than this. You may use the UPDATE TICKET option if doing so before the "Update by" date and time on the locate request and no sooner than seven (7) calendar days before the expiration (Good Thru) date and time on the original locate request.

If the allowable time to submit an update request has passed, use the NEW TICKET button on the next screen to submit a new request containing the same information from the previous ticket. Remember if submitting a NEW ticket, then the member facility operators have three (3) business days to respond. Please check your copy of the ticket for the new legal dates and times.

3. "RE-MARK" an existing locate request:

This application may be used to request a "RE-MARK" if facility markings are no longer clearly visible for the excavation location on a current locate request. Member facility operators are required to respond within three (3) business days to re-mark their facilities of the notice to RE-MARK. This application may also be used to submit a New locate request if the allowable time to submit a "RE-MARK" notice has expired. Please note that a RE-MARK notice does not extend the life of the locate request.

4. "CANCEL" an existing locate request:

Locate requests may be cancelled using this application as long as the "Legal" date and time has not passed on the request to be cancelled.

5. "VIEW" an existing locate request:

This application may be used to view the information of any of your locate requests processed within the last 350 days.

The ticket number and the phone number used when the original ticket was processed must be provided to access these applications. A valid email address must also be provided to facilitate Blue Stakes sending a confirmation of the request to the submitter.

If you are unable to meet ALL of these requirements, please exit this application and dial 811 or (800) 662-4111 to process your request during normal business hours (Monday - Friday 8:00 a.m. to 4:00 p.m., except holidays).

Requests submitted using this application are not valid until a "Successfully Submitted" message and the ticket and revision number are displayed.

We Are All Stronger Together

Stronger Together

One lucky winner will go home with this lovely sweatshirt!

A photograph of a severely damaged, single-story house. The roof is partially collapsed, and the exterior walls are heavily charred and peeling. Debris, including wood, metal, and household items, is scattered all over the yard. In the background, there are bare trees and other houses, suggesting a residential neighborhood affected by a disaster.

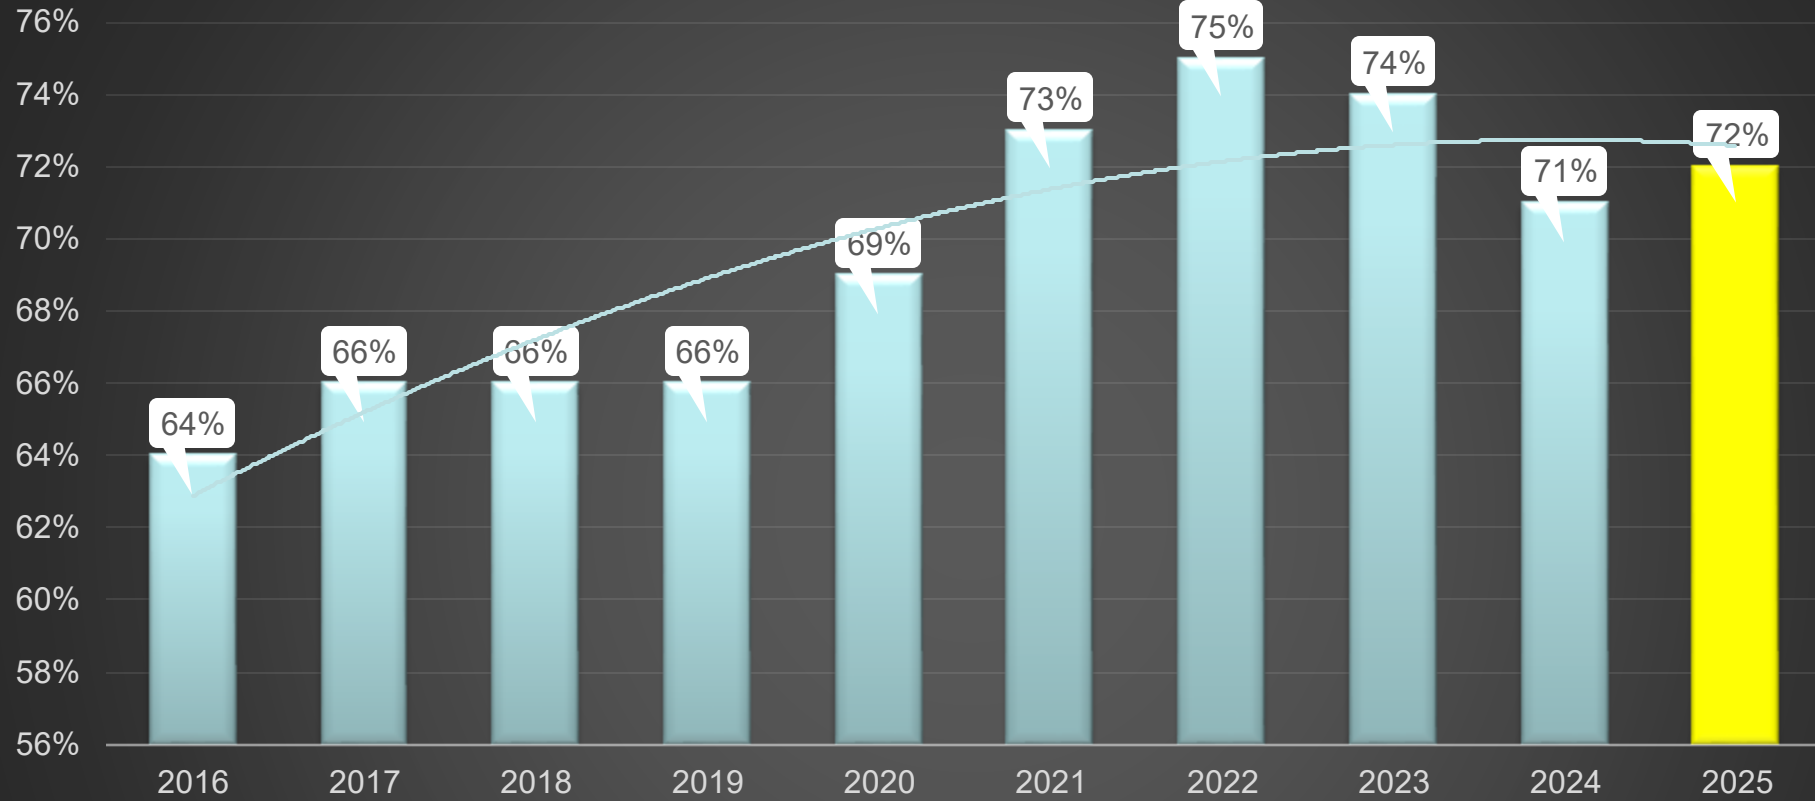

We must remain vigilant and resist the temptation to cut corners.

Life doesn't have a reset for some choices we make.

Post Assessment

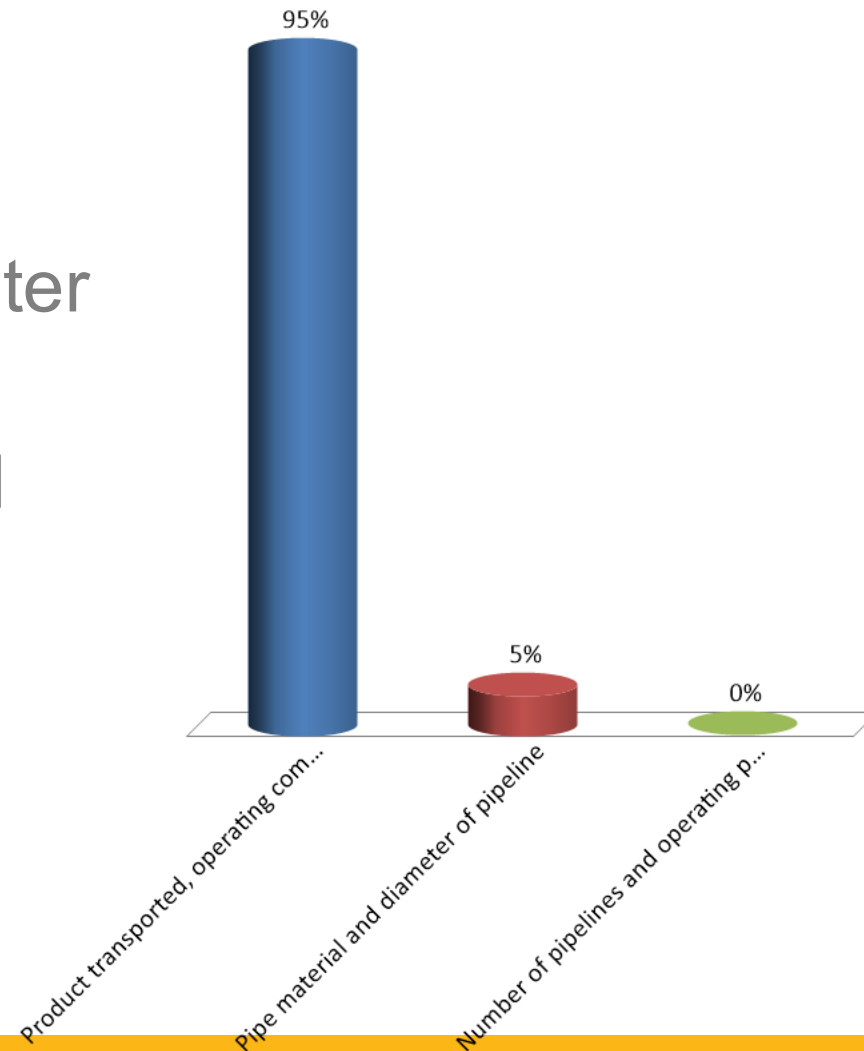

What depth are pipelines buried at?

- A. 4 feet
- B. 3 feet
- C. It Varies
- D. 5 Feet

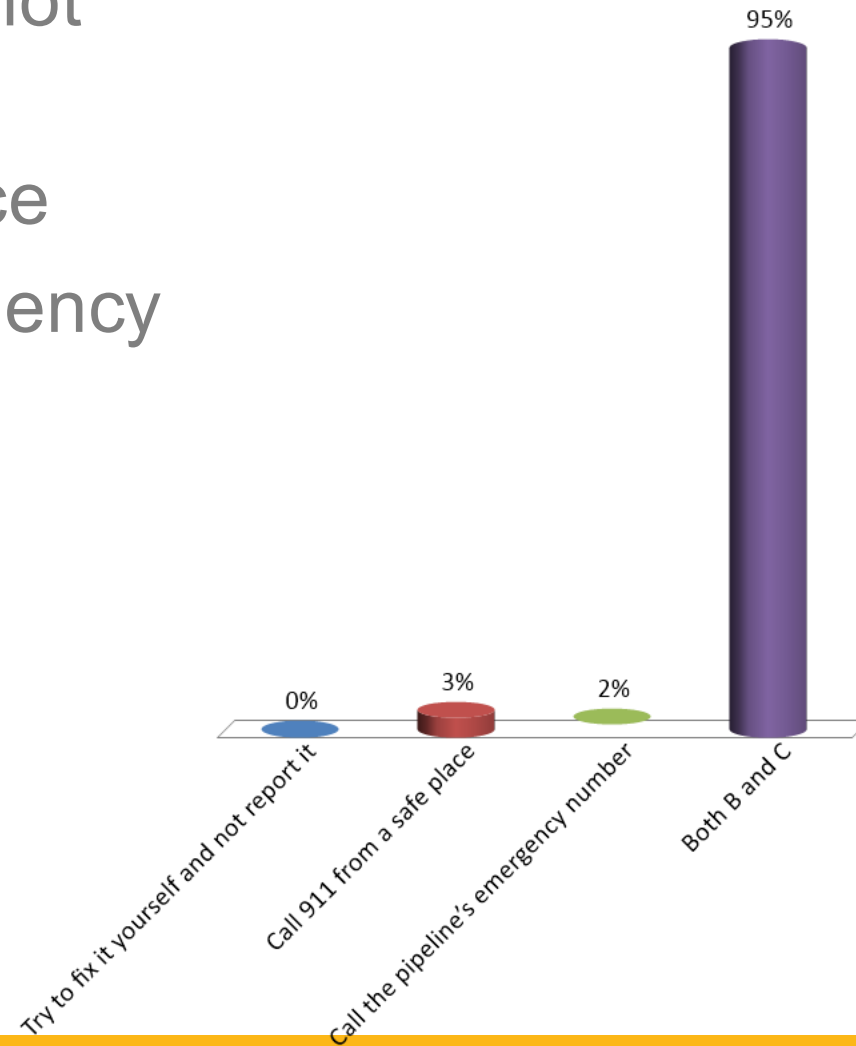

What information is required on all pipeline markers?

- A. Product transported, operating company, and emergency number
- B. Pipe material and diameter of pipeline
- C. Number of pipelines and operating pressure

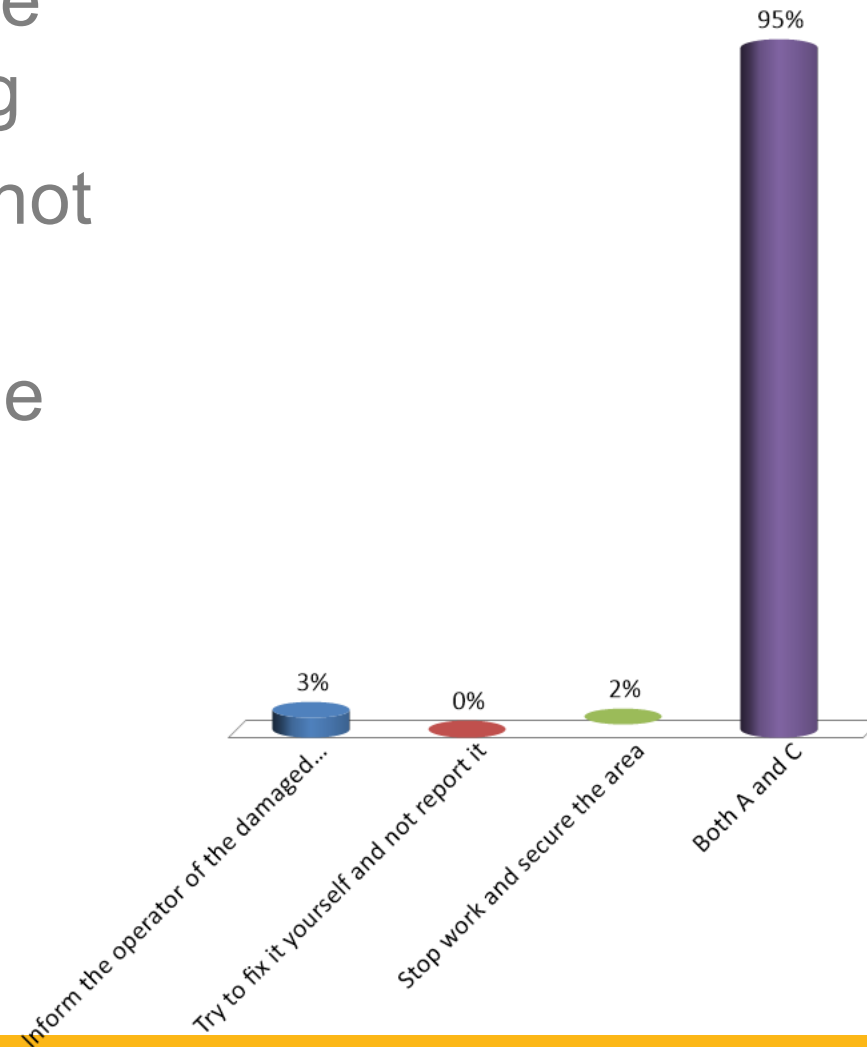

In the event of a pipeline emergency, which of the following actions should be taken?

- A. Try to fix it yourself and not report it
- B. Call 911 from a safe place
- C. Call the pipeline's emergency number
- D. Both B and C

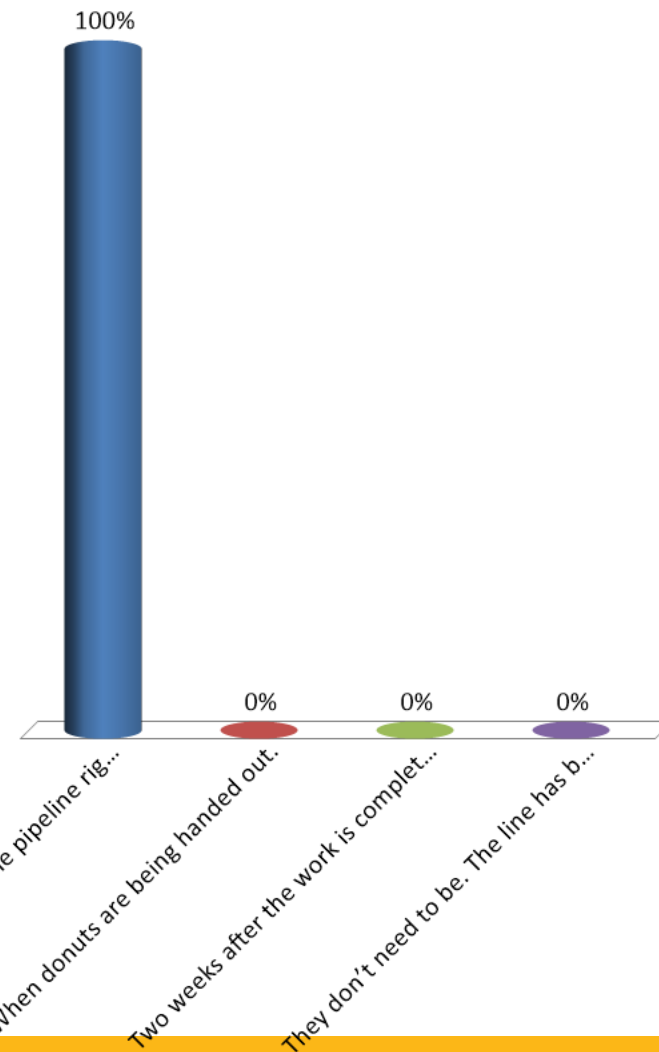

If you damage a pipeline while excavating, which of the following actions should be taken?

- A. Inform the operator of the damaged pipe or coating
- B. Try to fix it yourself and not report it
- C. Stop work and secure the area
- D. Both A and C**

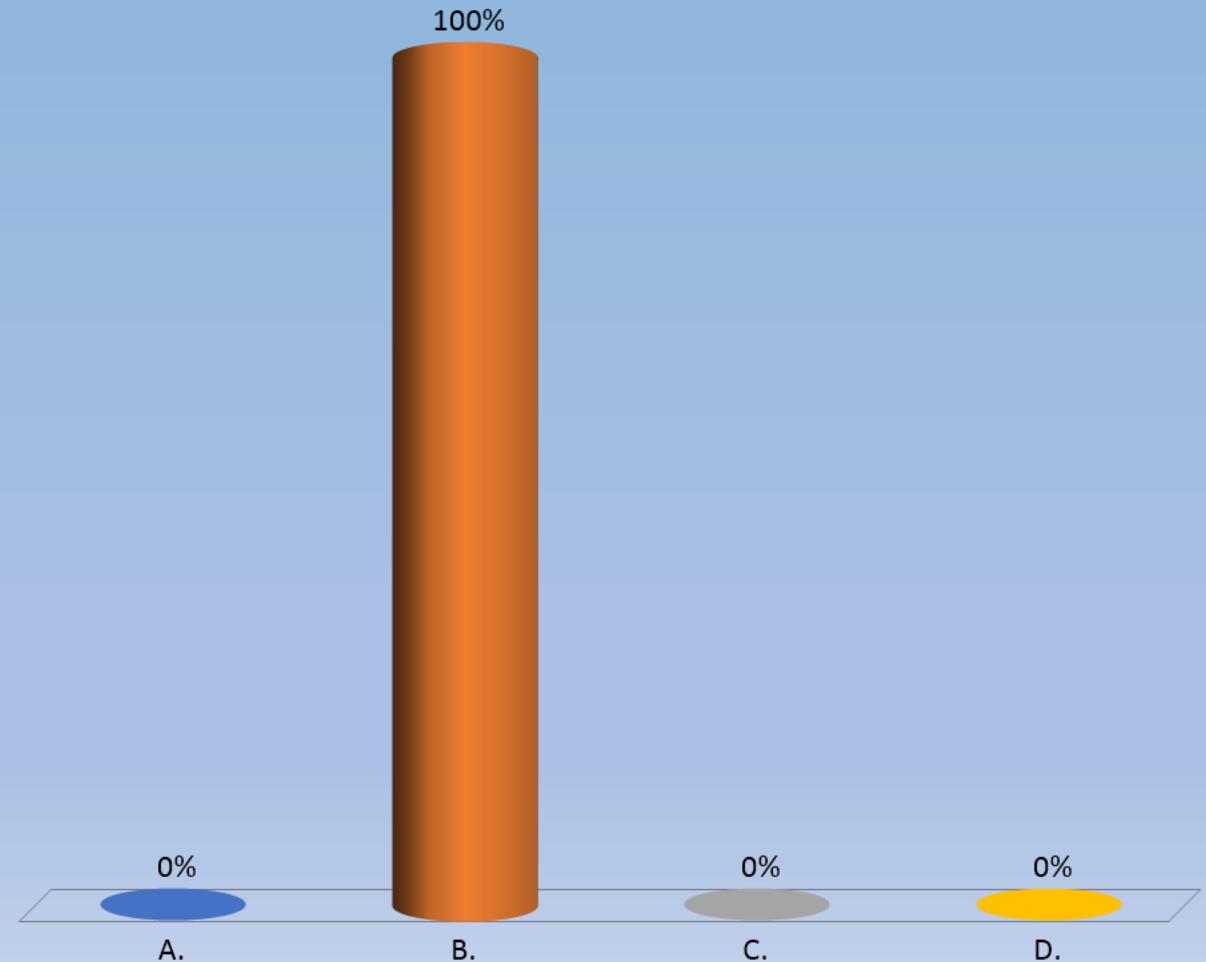

When would a Pipeline Operator need to be onsite...

- A. When working inside the pipeline right of way or inside the buffer zone.
- B. When donuts are being handed out.
- C. Two weeks after the work is completed.
- D. They don't need to be. The line has been marked.

What is the first step before any excavation in Utah?

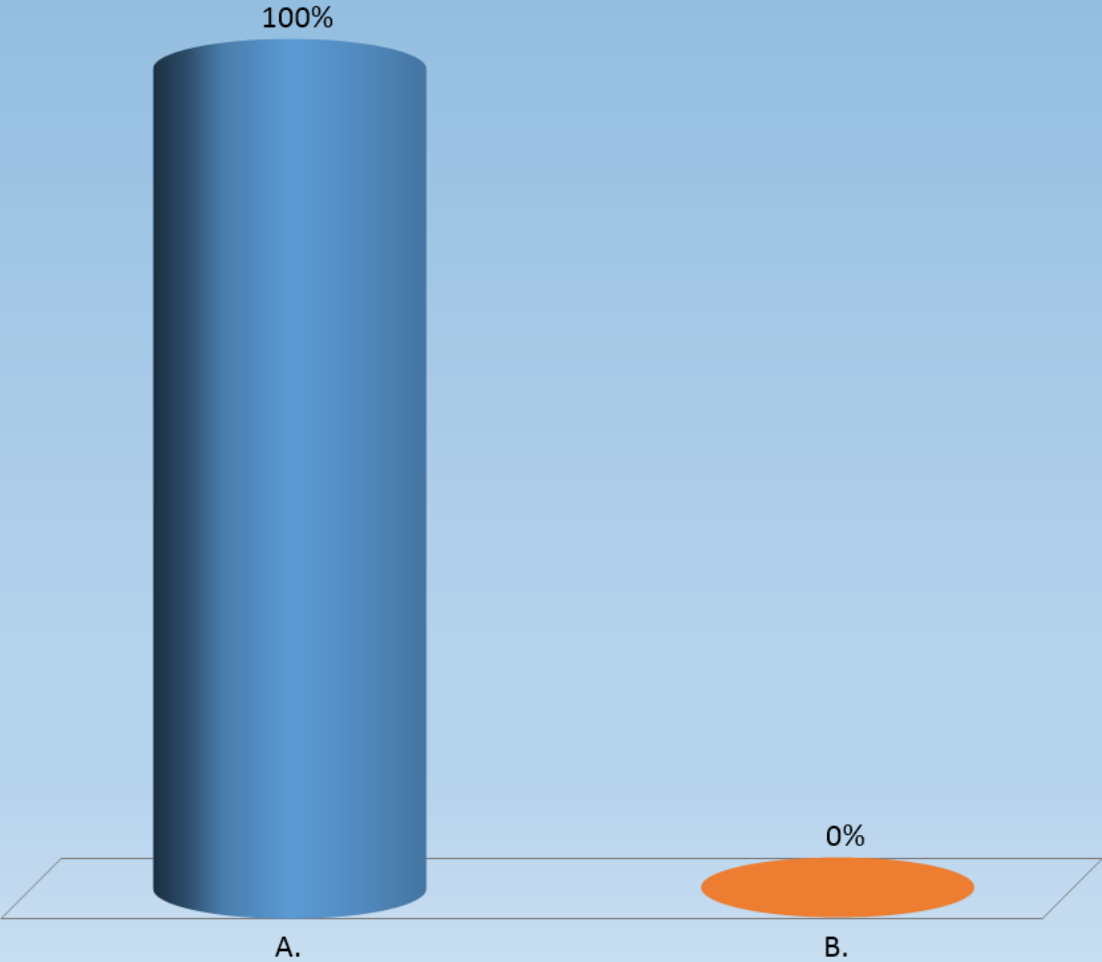

- A. Contact a private locating company
- B. Submit a locate request to Blue Stakes of Utah 811
- C. Begin digging carefully with a shovel
- D. Ask neighbors where their utility lines are

The state law requires ANYONE who is digging to contact Blue Stakes to submit a locate request?

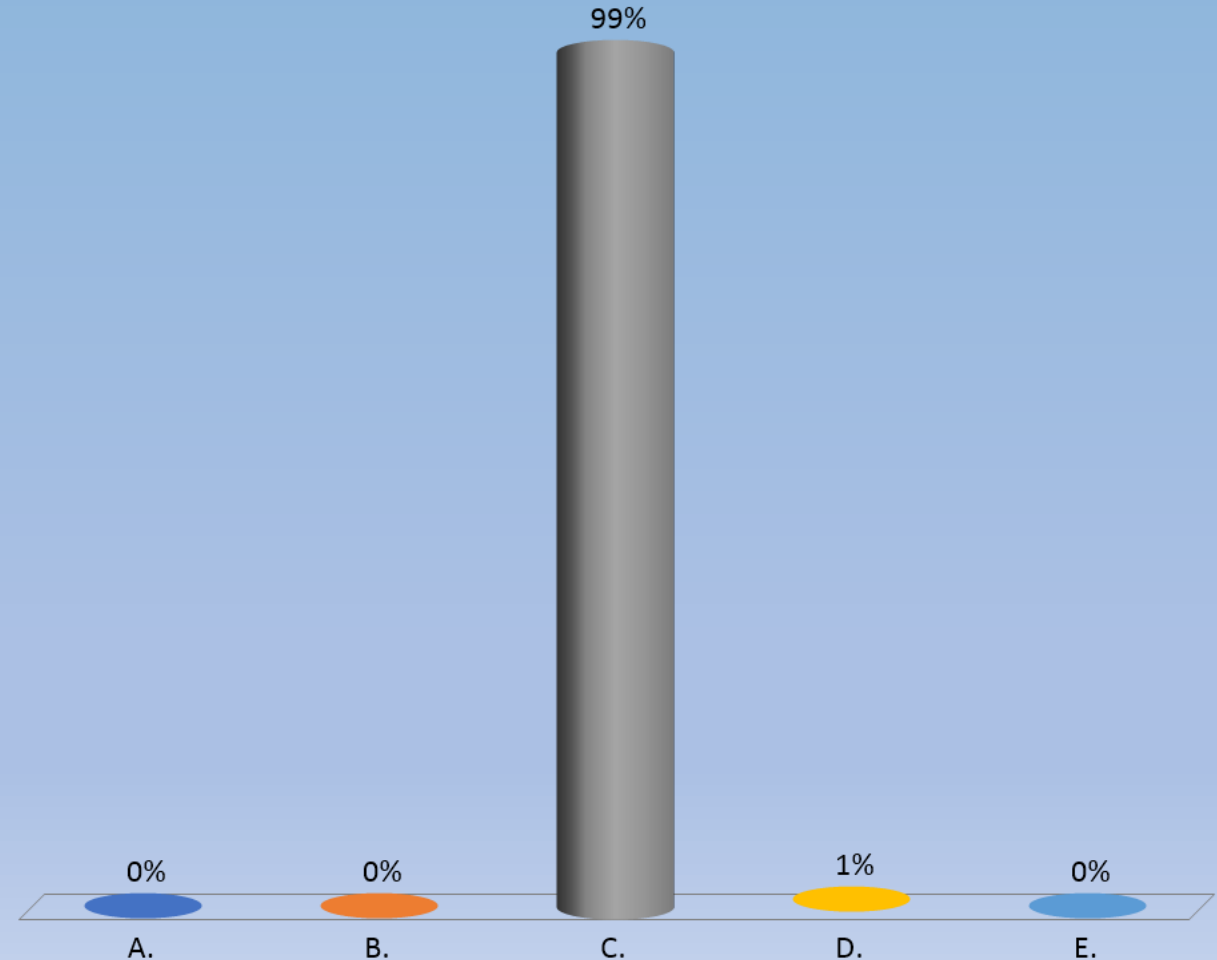

A. True

B. False

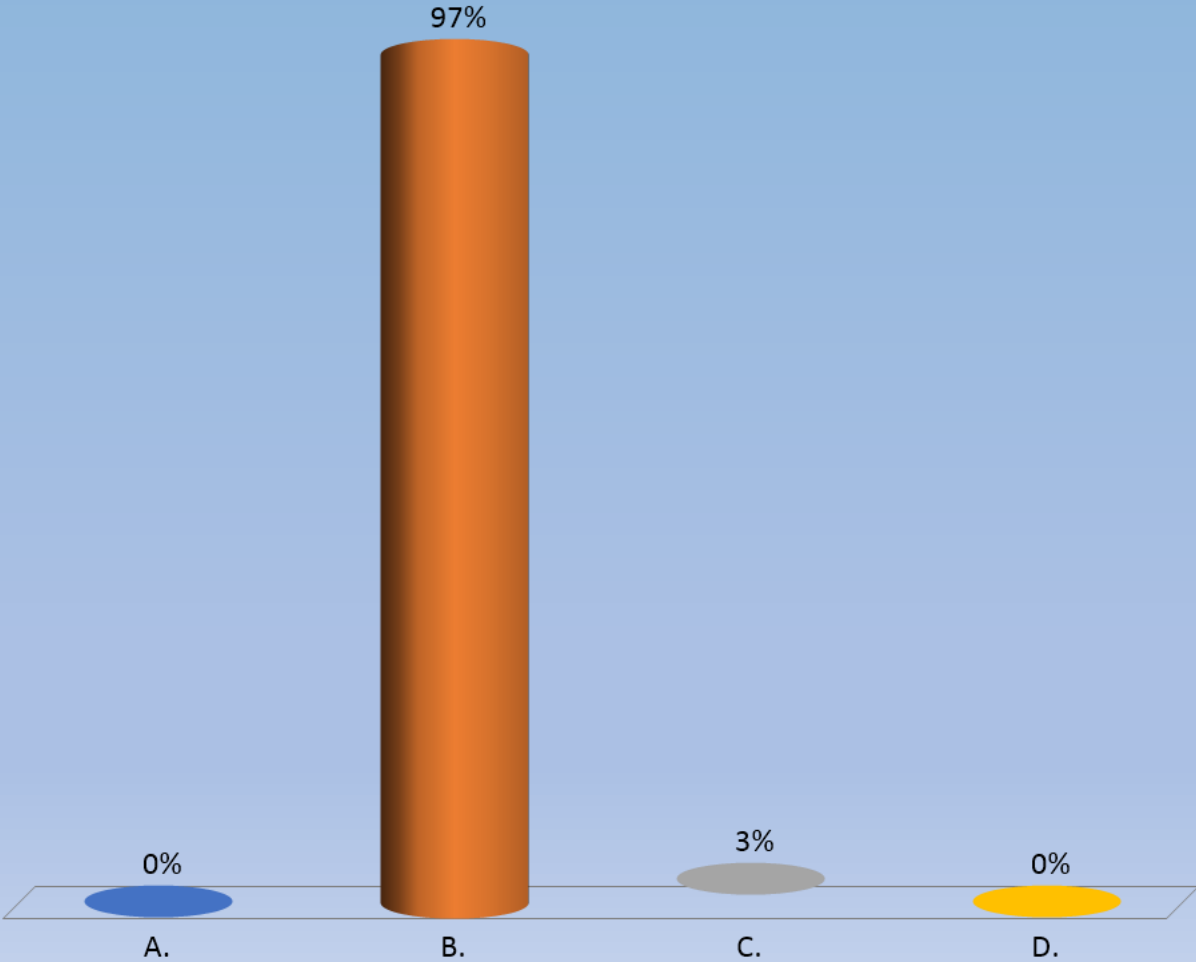

What are the Blue Stakes of Utah 811 Notification Center hours?

- A. 7 a.m. – 5 p.m.
- B. 7:30 a.m. – 5:30 p.m.
- C. 8 a.m. – 4 p.m.
- D. 8:30 a.m. – 4:30 p.m.
- E. 9 a.m. – 5 p.m.

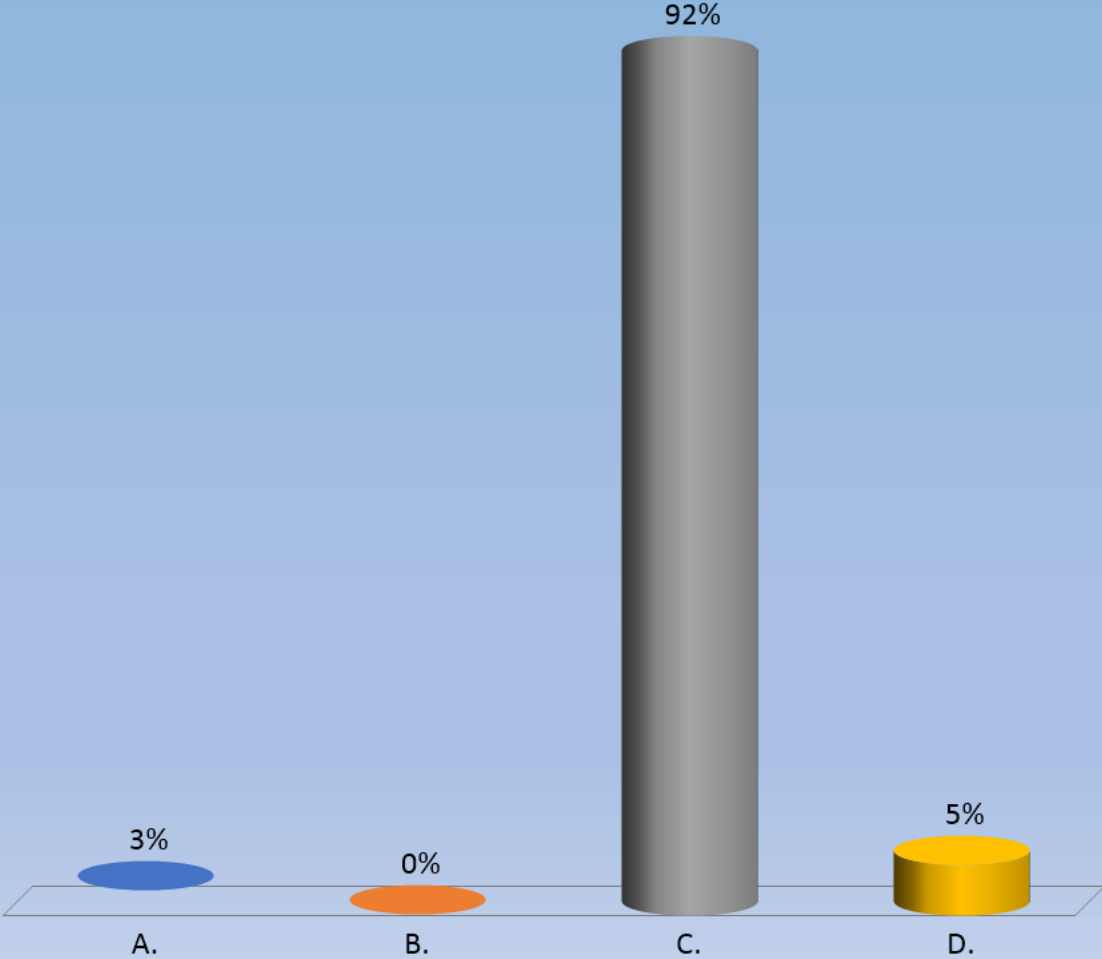

How much advance notice must be given in Utah before excavation (excluding emergencies)?

- A. At least 24 hours
- B. 3 business days
- C. 7 days
- D. Same day as the excavation

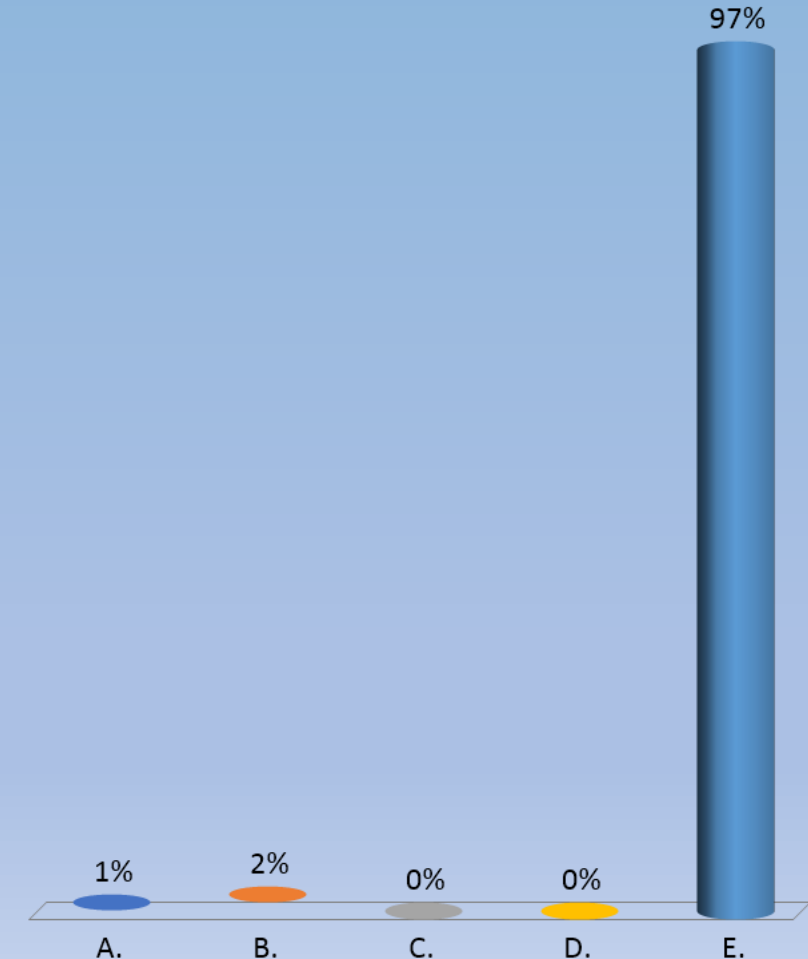

Who is responsible for locating and marking underground utilities after the locate request is made?

- A. The excavator or homeowner
- B. The city building inspector

SAFETY IS IN YOUR HANDS.
EVERY DIG. EVERY TIME.

5 STEPS TO SAFER DIGGING:

Always Contact 811 Before Digging

Contact 811 three (3) business days before digging

Wait the Required Amount of Time

Allow facility operators time to locate and mark facilities

Confirm Markings are Accurate

If facilities are not marked accurately or completely, submit a No Response Notice

Respect the Marks

Respect and protect markings throughout the excavation

Dig Carefully

Carefully dig using hand tools within the tolerance zone, 24 inches on either side of the markings

The Excavation Safety Guide & Directory (Pipeline Edition) is intended for use by professional excavators and includes state One-Call laws, tips for safe digging near pipelines.

TODAY'S LEARNING OBJECTIVES

- **Know what to do in case of a pipeline emergency.**
- **Learn more about Common Ground Alliance (CGA) and how to implement Best Practices.**
- **From Awareness to Action in Damage Prevention.**
- **Understanding state law and taking accountability in every stage of excavation.**

Did we meet our learning objectives today?

- A. All objectives were met**
- B. Most of the objectives were met**
- C. Some objectives were met**
- D. No objectives were met**

How much practical knowledge did you gain from today's event?

- A. A Lot**
- B. Some**
- C. A Little**
- D. None**

Overall Seminar Rating:

- A. Excellent**
- B. Very Good**
- C. Good**
- D. Fair**
- E. Poor**
